Genes and Proteins in Immunity

Traditionally, the multiplicity of the reactions involved in immune responses have been a source of excitement to some and yet frustration to many. However, with the advent of modern techniques in molecular biology, a considerable understanding of these complexities has begun to emerge. In recognition of the enormous contribution made to this field by Rodney Porter, the Biochemical Society held a special symposium in his honour in Oxford during July 1985. This volume contains the papers that were presented in tribute at the symposium.

EDITED BY J. KAY, M. A. KERR, A. F. WILLIAMS AND K. B. M. REID

The Molecular Basis of Movement Through Membranes

ORGANIZED AND EDITED BY P. J. QUINN AND C. A. PASTERNAK

Price £30.00 (US $55.00)

Order from THE BIOCHEMICAL SOCIETY BOOK DEPOT PO Box 32, Commerce Way, Colchester CO2 8HP, Essex, U.K.
BIOTECHNOLOGY

Edited by C. F. PHELPS and P. H. CLARKE

The fourteen contributions forming this volume were presented at a London meeting of the Biochemical Society including the Society’s Forty-Eighth Symposium ‘Biotechnology’, in December 1982. With today’s increasing pressures to develop latest laboratory findings into practical industrial processes as quickly as possible the chosen theme of this Symposium was a timely one. The papers represent up-to-date reports from international biochemists whose work is of direct relevance to the wide areas of interests concerned with biotechnology, together with glimpses of the early development of its techniques and a look at its exciting future.
