colloquia

638th Meeting, Reading

colloquium: Redesigning Crop Products for Biotechnology: Starch and Fructan

Starch biosynthesis and its regulation
J. Preiss, K. Ball, B. Smith-White, A. Iglesias,
G. Kakefuda & L. Li 539

The pathway of starch synthesis in developing pea embryos
A. M. Smith, C. Martin & K. Denver 547

Aspects of molecular organization and ultrastructure in starch granules
M. J. Gidley & D. Cooke 551

Current and potential food and non-food applications of fructans
A. Fuchs 555

Useful characteristics and commercial applications of fructo-oligosaccharides
H. Hidaka & M. Hiyayama 561

Molecular biology of fructan accumulation in plants
S. Speekens, G. Angenent, M. Ebskamp & P. Weisbeek 565

Fructan quality and fructan synthesis
P. John 569

colloquium: Comparative Aspects of Respiratory Electron Transfer Complexes

Proton-translocating transhydrogenase from photosynthetic bacteria
J. B. Jackson, T. M. Lever, J. Rydstrom,
B. Persson & E. Carlener 573

Towards the construction of a universal NAD(P)⁺-dependent dehydrogenase: comparative and evolutionary considerations
A. R. Clarke, S. Colebrook, A. Cortes, D. C. Emery,
D. J. Halsall, K. W. Hart, R. M. Jackson,
H. M. Wilks & J. J. Holbrook 576

Simplicity and complexity in electron transfer between NADH and c-type cytochromes in bacteria
B. C. Berns & S. J. Ferguson 581

Complexes or super complexes: inhibitor titrations show that electron transfer in chromatophores from Rhodobacter sphaeroides involves a dimeric UQH₂:cytochromes c₂ oxidoreductase, and is delocalized
J. Fernandez-Valesco & A. R. Crofts 588

Iron-sulphur clusters in electron transfer, catalysis and control
A. J. Thomson, J. Breton, S. J. George, J. N. Butt,
F. A. Armstrong & E. C. Hatchikian 594

Electron transfer in succinate:ubiquinone reductase and quinol:fumarate reductase
J. C. Salerno 599

Volume 19 Part 3 August 1991
Bacterial dimethyl sulphoxide reductases and nitrate reductases  A. G. McEwan, N. Benson, T. C. Bonnett, S. P. Hanlon, S. J. Ferguson, D. J. Richardson & J. B. Jackson  605

The happy family of cytochrome oxidases  M. Saraste, L. Holm, L. Lemieux, M. Lubben & J. van der Oost  608

A comparative review of the structure and function of cytochrome o from Escherichia coli and cytochrome aa₃  W. J. Ingledeuw & M. Bacon  613

Ligation and electronation states of cytochrome-c oxidase in relation to other oxidases and peroxidases  A. J. Moody  617

colloquium: Genetic Approaches to Oligosaccharide Metabolism

Biochemistry and expression of bacterial capsules  K. Jann & B. Jann  623

Capsule production in Escherichia coli: co-ordinate regulation of biosynthesis and export by environmental factors  C. Pazzani, I. Roberts & G. Boulnois  628

Genetics of Haemophilus influenzae lipopolysaccharide expression  D. Maskell & E. R. Moxon  631

Rhizobium meliloti exopolysaccharides: genetic analyses and symbiotic importance  T. L. Reuber, J. Reed, J. Glazebrook, M. A. Glucksmann, D. Ashmann, A. Marra, & G. C. Walker  636

Genetic regulation of asparagine-linked oligosaccharide synthesis  P. W. Robbins  642

A transfected human fucosyltransferase cDNA determines biosynthesis of oligosaccharide ligand(s) for endothelial-leukocyte adhesion molecule I  J. B. Lowe, L. M. Stoolman, R. P. Nair, R. D. Larsen T. L. Behrend & R. M. Marks  649

colloquium: Food Biotechnology

Protein engineering to change thermal stability for food enzymes  P. W. Goodenough & J. A. Jenkins  655

Protein engineering of chymosin and expression in Trichoderma reesei  J. E. Pitts, D. Quinn, J. Uusitalo & M. Penttila  663

Proteinase genes of cheese starter cultures  J. Kok  670

Development of bacteriophage-resistant strains of lactic acid bacteria  T. R. Klaenhammer  675

</table>
Role of esterases in resistance of insects to insecticides
A. L. Devonshire 755

Enzymic factors in the resistance of stored-product pests to insecticides
N. R. Price 759

Enzymes and resistance to insecticides in Heliothis virescens
A. R. McCaffery, C. H. Walker, S. E. Clarke & K. S. Lee 762

colloquium: Molecular Aspects of Fungal Sterol Biosynthesis and Inhibition

Sterol biochemistry in filamentous fungi: a coming of age
M. W. Goosey & D. J. Moore 769

Squalene epoxidase as a target for the allylamines
N. S. Ryder 774

Sterol 14α-demethylase and its inhibition: structural considerations on interaction of azole antifungal agents with lanosterol 14α-demethylase (P-450_{14DM}) of yeast
Y. Yoshida & Y. Aoyama 778

Cytochrome P-450-dependent 14α-sterol demethylase of Candida albicans and its interaction with azole antifungals
C. A. Hitchcock 782

Morpholine antifungals and their mode of action
E. I. Mercer 788

Molecular modelling of the sterol C-14 demethylase of Saccharomyces cerevisiae
G. M. Morris & W. G. Richards 793

Molecular genetic studies on the mode of action of azole antifungal agents
K. S. L. Kelly, J. Rowe & P. F. Watson 796

RIP (repeat induced point mutation) as a tool in the analysis of P-450 and sterol biosynthesis in Neurospora crassa
I. F. Connerton, S. M. Deane, J. A. Butters, R. S. T. Loeffler & D. W. Hollomon 799
Redesigning crop products for biotechnology: starch and fructan

Lipid metabolism during seed development in oilseed rape (Brassica napus L. cv. Shiralee)  
H. J. Perry & J. L. Harwood  243S

Post-Golgi secretory pathways

A rapid method for Golgi membrane isolation from etiolated pea epicotyls  
M. H. P. Delarge, M. C. Hobbs & C. T. Brett  244S

Interactions between a xylosyltransferase and a glucuronyltransferase involved in glucuronoxylan synthesis in pea epicotyls  

Post-translational processing and regulated release of corticotropin-releasing hormone (CRH) in AtT20 cells expressing the human proCRH gene  
M. Castro, P. Lowenstein, B. Glynn, M. Hannah, E. Linton & P. Lowry  246S

Characterization of anti-peptide CFTR antibodies  
M. M. C. Pereira, R. L. Dormer & M. A. McPherson  247S

Secretion of a chymosin-insulin fusion in Trichoderma reesei  
S. E. Lawler, J. E. Pitts, D. Mantafounis, R. Gill, J. Ugitalo & M. Penttilä  248S

Specificity of a protease from ovine adrenal medulla chromaffin granules  
N. Tezapsidis & D. Parish  249S

Formation of glucuronoxylan linked to protein in plant Golgi and plasma membranes  

Comparative aspects of respiratory electron transfer complexes

The sodium-motive NADH-ubiquinone oxidoreductase of Vibrio alginolyticus  
R. M. Bourne & P. R. Rich  251S

Cytochrome c and c-554 oxidation by membranous Anaecyctis nidulans cytochrome oxidase  
P. Nicholls, C. Osinger, H. Niederhauser & G. A. Peschek  252S

Loss of hepatic cytochrome aa3 during chronic valproate treatment: dissociation of proton pumping and electron transport in Complex IV  
S. Ponchaut, J.-P. Draye, F. van Hoof & K. Veitch  253S

Evidence for a pH-dependent anion channel in sheep heart mitochondria  
T. D. Spurway & R. Ashley  254S

An intracellular anion channel from rat brain microsomes which is also permeable to cations  
D. Murray & R. Ashley  255S

Applications of pulsed EPR spectroscopy to the study of mitochondrial iron-sulphur clusters and Escherichia coli fumarate reductase  
J. K. Shergill, J. H. Weiner & R. Cammack  256S

The effect of membrane potential on the protonophoric action of oleic acid  
M. A. Sharpe, C. E. Cooper & J. M. Wrigglesworth  257S

The active site structure of cytochrome oxidase: modelling by ‘catalytic homology’  
J. M. Wrigglesworth  258S

The cytochrome oxidase g'=12 EPR signal  
Roles of molybdenum, FAD and iron-sulphur domains in molybdenum-containing hydroxylases: molecular genetic, kinetic and spectroscopic studies

Ischaemia/anoxia-induced increases in cardiac mitochondrial respiration: changes in Complex I

Heterogeneity in fast cyanide-binding preparations of cytochrome-c oxidase

MOA-stilbene: a new effector of the Q, site of the chloroplast cytochrome bf complex

Genetic approaches to oligosaccharide metabolism

Studies of lotus-extracted haptoglobin in inflammatory bowel disease

Food biotechnology

Protein engineering of the surface loops of chymosin

Engineering the pH profile of chymosin

Modifying the substrate specificity of chymosin

Lipid metabolism in tissue culture of olive (Olea europeae)

Cogelation of xanthan gum with modified guar galactomannan

Production of the amylolytic enzymes of Penicillium expansum

Immobilization of enzymes to nylon film

Partial denaturation and renaturation of β-lactoglobulin at air-water interfaces

Aminopeptidase A from Lactococcus lactis

Extraction of organic acids using a supported liquid membrane

Mass transfer studies on the extraction and separation of proteins using reverse micelles

Regulation of protein synthesis

Effects of catecholamines on protein synthesis and cyclic AMP concentrations in the isolated working heart

Stimulation of cardiac protein synthesis by insulin-like growth factors

Expression of drug resistance in Chinese hamster ovary (CHO) cells following X-ray pre-treatment in vitro

Analysis of a novel elongation factor: EF-3
Role of the 5' mRNA leader in heat shock gene expression in yeast
The use of allosuppressor alleles of the SAL4 gene in the study of translational fidelity in Saccharomyces cerevisiae
40S ribosomal complexes in reticulocyte lysates treated with the haem-controlled elf-2a kinase
Metallothionein gene expression in the intestinal cell: modulation of mRNA and protein synthesis by copper and zinc
The molecular basis of the interaction of EF-Tu with kirromycin: overproduction of perdeuterated EF-Tu

Proteinases

Growth-related proteinase activity in a recently-established human tumour cell culture
Purification and characterization of cysteine proteinases from human osteoclastomas
The measurement of human collagenase-TIMP complex by enzyme immunoassay
Cloning of a cDNA for porcine type I collagenase and expression in E. coli
Potential metal ligands in the insulinase superfamily of endopeptidases
N-[1(RS)-Carboxy-3-phenyIpropyl]peptides as inhibitors of thimet oligopeptidase
The multicatalytic proteinase complex: interaction between catalytic sites?
Catalytic subunits of the multicatalytic proteinase
Immunocytochemical localization of the multicatalytic proteinase in rat liver and in L-132 cells
Proteolysis of lung elastin by human neutrophil elastase
Membrane-bound peptidases of Helix aspersa
Limited proteolysis as a probe for protein folding
The relationship between thaumatin, a sweet protein and thaumatopain, a cysteine protease, from the arils of Thaumatococcus danielli
Expression of HIV-1 proteinase in E. coli
A comparison of the rat anti-proteinases alphamacroglobulin and decidualization-associated protein
Decidualization-associated protein is an anti-proteinase and inhibits lymphocyte proliferation

A. D. Hartley, B. Girstel, J. E. G. McCarthy & M. F. Tuite 280S
Akhmaloka, C. M. Grant, I. Stanfield & M. F. Tuite 281S
B. Joshi, S. Joshi-Barve, R. E. Rhoads & V. M. Pan 282S
M. L. Scarino, R. Poverini, G. Di Lullo & B. Bises 283S
K. Kennedy, D. Block & J. Barber 284S
C. A. Tse & G. K. Scott 285S
A. Page, M. J. Warburton, T. J. Chambers & A. R. Hayman 286S
I. M. Clark, J. K. Wright & T. E. Cawston 287S
M. C. O'Hare, N. J. Clarke, T. E. Cawston & G. P. Harper 288S
N. D. Rawlings & A. J. Barrett 289S
C. G. Knight & A. J. Barrett 290S
H. Diaballah & A. J. Rivett 291S
P. J. Savory & A. J. Rivett 292S
S. Hannah & A. P. Ryle 294S
M. A. Ramzan, E. J. Cookson & R. J. Beynon 296S
A. G. Stephen, R. Powls & R. J. Beynon 297S
D. J. H. Gaskin & A. F. Wilderspin 298S
N. A. Teixeira & J. E. O'Grady 299S
N. A. Teixeira, G. Fava, E. Bronze, A. Sousa & J. E. O'Grady 300S
The role of enzymes in regulating the toxicity of xenobiotics

Biochemical effects of environmental pollution in fishes from the Spanish South-Atlantic littoral
A. Rodríguez-Arizá, G. Dorado, J. Periáñez, C. Pueyo & J. López-Barea 301S

H.p.l.c. isoenzyme patterns of glutathione transferase from marine fishes with different levels of pollution
P. Pascal, E. Martínez-Lara, F. Toribio, J. López-Barea & J. A. Barcena 302S

Sexual dimorphism in trans-cypermethrin hydrolysis in the domestic chicken

Substrate specificity of human serum paraoxonase
M. I. Mackness, S. Arric, P. N. Durrington 304S

Purification and characterization of a mosquito carboxylesterase involved in insecticide resistance
A. J. Ketterman, K. G. I. Jayawardena & J. Hemingway 305S

Polymorphisms of human liver carboxylesterases
A. J. Ketterman 306S

General topics

Location and characteristics of epidermal growth factor binding to enterocyte plasma membranes
C. L. Mynott, S. A. Pinches, A. Garner & S. P. Shraazi-Beechey 307S

Arachidonic acid as a feedback inhibitor of phospholipid methylation in rat polymorphonuclear leucocytes
G. Choi, B. Gao & W. A. Gibbons 308S

Influence of peptides associated with the gastrointestinal tract on ovine perirenal fat lipogenesis
A. S. H. Baba & P. J. Butterly 309S

Disturbed methionine metabolism in pancreatitis
D. Schofield, T. Bottigleri & J. M. Braganza 310S

Sensitivity of serum insulin concentrations to glucagon-like peptide 1 (7-36) amide in sheep
A. Faulkner 311S

Structural comparison of three viral “fusion” proteins
B.H. Nicholson & M. Naase 312S

Nuclear magnetic resonance studies on the mode of action of erythromycin A
J. I. Gyi & J. Barber 313S

Chylomicrons are the preferred substrate for lipoprotein lipase in vivo
J. L. Potts, R. M. Fisher, S. M. Humphreys, S.W. Coppack, G. F. Gibbons & K. N. Frayn 314S

Gastric inhibitory polypeptide responses to nutrient absorption in ruminants
J. P. McCarthy, A. Faulkner, P. A. Martin & D. J. Flint 315S

Ferric iron reduction and uptake by mouse duodenal mucosa
K. B. Raja, R. J. Simpson & T. J. Peters 316S

Iron speciation in hypotransferrinaemic mouse serum

Lipid changes in individual membranes of Acanthamoeba castellanii during temperature adaptation
A. L. Jones, D. Lloyd, A. C. Hann & J. L. Harwood 318S

Synthesis of 5-aminolevulinate in pea Pisum sativum L. leaves
C. E. Pugh, J. L. Harwood, T. Lewis, T. Cromartie & R. A. John 319S

The effect of diflufenican on lipid metabolism in plants
I. P. Ashton, K. E. Pallett, D.J. Cole & J.L. Harwood 320S

The effect of oleate and spermine on the subcellular distribution of phosphatidate phosphohydrolase (PAH, EC 3.1.3.4)
Fatty acid profile of plasma lipids from patients with Crohn's disease before and after 4 weeks of elemental diet ("0 28" or "Vivonex")

K. Teahan & S. Venkatesan

Adenosine (Ado) uptake in brush-border membrane vesicles from rat kidney (BBM)

Protein factors involved in the expression of the α-fetoprotein gene

N. Ferrer, J. Portucal & R. Franco

Lack of apoliprotein synthesis by rat spleen

M. A. Mindham & P. A. Mayes

Comparative hepatic metabolism of chylomicron remnants prepared in vivo or in vitro

T. Guldur & P. A. Mayes

Partial characterization of a TRH-immunoreactive peptide from rabbit prostate

S. M. Cockle, A. Atken & S. Howell

Transfection of chick cells by non-retroviral DNA

The effect of block co-polymers on the uptake of model polystyrene microspheres by Kupffer cells — in vitro and in vivo studies

I. S. Mur, S. M. Moghimi, L. Illum, S. S. Davis & M. C. Davies

Detection of genes encoding novel members of the ligand responsive transcription factor superfamily in Xenopus laevis

P. J. Matharu & G. E. Sweeney

The effects of interleukin-5 on mitogenically stimulated rat spleen cells

A. G. Pockley & P. C. Montgomery

Purification of xanthine oxidase from human milk

R. Harrison, S. Abadah & M. Benboubetra

Nature of the HABA binding to human serum albumin

A. L. Tarnoky, B. H. Nicholson & D. Savva

Digestive enzymes of the West African giant land snail, Archachatina marginata

F. E. Abadom & D. W. Millsom

Activity and characteristics of an acid cholesteryl ester hydrolase in the rat lactating mammary gland

K. M. Botham

Effects of pancuronium and vecuronium on creatine kinase in rat isolated heart, liver, kidney and diaphragm

F. A. Wali & V. Makinde

Bacterioferritin: structural modelling and molecular symmetry of Escherichia coli BFR

J. M. A. Smith

A potential motor neurone-specific monoclonal antibody (MN-1)

A. T. Rogers, R. Harrison, J. Blaydes, J. Barnes & G. G. Lunt

The mouse U7 small nuclear RNA gene promoter functions efficiently in Xenopus oocytes

S. C. Phillips & P. C. Turner

Isolation of a potato U6 small nuclear RNA gene

Y. Hu, J. W. S. Brown, R. Waugh & P. C. Turner

Unusual compartmentalization of mouse U7 small nuclear transcripts in Xenopus oocytes

P. C. Turner & S. C. Phillips

Deletions downstream of the 3′ box of the mouse U7 small nuclear RNA gene dramatically affect transcription

S. C. Phillips & P. C. Turner

Purine de novo synthesis and enzymes at the inosinic branch point in human lymphocytes

E. Marinello, R. Pagani, F. Carlucci, M. Pizzichini, P. Valerio, M. Mounielli, E. Dispensa & A. Tabucchi
