## colloquia

### 639th Meeting, Manchester

#### colloquium: The Extracellular Matrix in Health and Disease

<table>
<thead>
<tr>
<th>Topic</th>
<th>Authors</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>The extracellular matrix in health and disease: preface</td>
<td>M. E. Grant &amp; M. J. Humphries</td>
<td>803</td>
</tr>
<tr>
<td>The human collagen X gene: complete primary sequence and re-expression in osteoarthritis</td>
<td>J. T. Thomas, C. J. Cresswell, B. Rash, J. Hoyland</td>
<td>804</td>
</tr>
<tr>
<td>On the regulation of collagen-fibril shape and form</td>
<td>D. F. Holmes, R. B. Watson &amp; K. E. Kadler</td>
<td>808</td>
</tr>
<tr>
<td>Approaches to the design of anti-fibrotic drugs</td>
<td>T. J. Franklin, N. J. Hales, D. Johnston, W. B. Morris, C. J. Cunliffe, A. J. Millett &amp; G. B. Hill</td>
<td>812</td>
</tr>
<tr>
<td>Biology and pathology of the pericellular heparan sulphate proteoglycans</td>
<td>G. David</td>
<td>816</td>
</tr>
<tr>
<td>Structure and function of the fibril-associated collagens</td>
<td>M. van der Rest, E. Aubert-Foucher, B. Dublet, D. Eichenberger, B. Font &amp; D. Goldschmidt</td>
<td>820</td>
</tr>
<tr>
<td>Integrins in thrombosis, wound healing and cancer</td>
<td>D. A. Cheresh</td>
<td>835</td>
</tr>
<tr>
<td>Cell adhesion to type-VI collagen</td>
<td>M. Almalley, U. Specks &amp; R. Timpl</td>
<td>843</td>
</tr>
</tbody>
</table>

#### colloquium: Biochemistry of the Eye

<table>
<thead>
<tr>
<th>Topic</th>
<th>Authors</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Anion pumps in ocular tissues</td>
<td>S. Hodson, J. Guggenheim, D. Kala &amp; C. Wigham</td>
<td>849</td>
</tr>
<tr>
<td>Molecular interactions in the eye lens</td>
<td>C. Sungisy, A. Simpson, A. Ferszt, O. A. Bateman &amp; V. Nalini</td>
<td>853</td>
</tr>
<tr>
<td>Signal transduction in photoreceptors</td>
<td>K. Langmack &amp; H. Saibil</td>
<td>858</td>
</tr>
<tr>
<td>Structural and biochemical changes in the sclera of experimentally myopic eyes</td>
<td>N. A. McBrien, H. O. Machado, A. P. Reeder &amp; S. Moules</td>
<td>861</td>
</tr>
<tr>
<td>Structure and properties of dermatan sulphate proteoglycans</td>
<td>L. Coster</td>
<td>866</td>
</tr>
<tr>
<td>Morphological and biochemical studies of the structure of the vitreous and the zonular fibres</td>
<td>R. Mayne, R. G. Brewton, D. W. Wright &amp; Z. X. Ren</td>
<td>868</td>
</tr>
</tbody>
</table>
Whole-organ enzymology of the creatine kinase system in heart  
J. S. INGWALL  1006

Manipulating creatine kinase activity in transgenic mice to study control of energy metabolism  
M. J. BROSNAN, J. M. HALOW & A. P. KORETSKY  1010

Colloquium: Cytoskeleton: Its Role in Cellular Function

Introductory remarks  
J. Hesketh & I. Pryme  1015

Role of actin-binding proteins in cytoskeletal dynamics  
A. G. WEEDS, J. GOOCH, M. HAWKINS, B. POPE & M. WAY  1016

Aspects of the evolution of the lamin/intermediate filament protein family: a current analysis of invertebrate intermediate filament proteins  
K. WEBER, D. REIMER & H. DODEMONT  1021

Microtubule dynamic instability: some possible physical mechanisms and their implications  
P. M. BAYLEY & S. R. MARTIN  1023

Cytoskeletal proteins in adherens-type cell-matrix junctions  
D. R. CRITCHLEY, A. GILMORE, L. HEMMING, P. JACKSON, A. McGUIRE, V. OHANIAN, B. PATEL, G. WATTS & C. WOOD  1028

Diversity of ankyrins in the brain  
V. BENNETT, E. OTTO, M. KUNMOTO, E. KOBELI & S. LAMBERT  1034

Red cell membrane cytoskeleton and the control of membrane properties  
J. C. PINDER  1039

p103 and A60: novel proteins of the neuronal membrane-associated cytoskeleton  
N. V. L. HAYES, D. A. RAYNER, A. WOODS & A. J. BAINES  1042

Dynamic changes in neutrophil cytoskeleton during priming and subsequent surface stimulated functions  
N. CRAWFORD & P. EGGLETON  1048

Generation of plasma membrane domains in polarized epithelial cells: role of cell-cell contacts and assembly of the membrane cytoskeleton  
W. J. NELSON  1055

Desmosomal glycoproteins I, II and III: novel members of the cadherin superfamily  
G. N. WHEELER, R. S. BUXTON, A. E. PARKER, J. ARNEMANN, D. A. REES, I. A. KING & A. I. MACEE  1060

α-Actinin: a direct link between actin and integrins  
F. M. PAVALKO, C. A. OTEY, K. O. SIMON & K. BURRIDGE  1065

Syndecan, a regulator of cell behaviour, is lost in malignant transformation  
M. JALKANEN, K. ELLENUS, P. INNI, J. KIRJAVAINEN & S. LEPPA  1069

Developmental changes in expression of adhesion-mediating proteins in human aortic smooth muscle  
V. E. KOTELIANGKY, A. M. BELKIN, M. C. FRID & M. A. GULKHOVA  1072

Cell-cell adhesion molecules  
E. BOCK  1076

Microtubule organization in growth cones  
P. R. GORDON-WEEKS  1080

Calcium, the cytoskeleton and calpactin (annexin II) in exocytotic secretion from adrenal chromaffin and mammary epithelial cells  
R. D. BURGOYNE, S. E. HANDEL, A. MORGAN, M. E. RENNISON, M. D. TUNNER & C. J. WILDE  1085
The integration of mass spectrometry into the biochemistry laboratory  
K. K. Mock, M. Davey, M. P. Stevenson & J. S. Cotrell  
948

A comparison of electrospray-ionization m.s. and matrix-assisted laser desorption time-of-flight m.s. for the analysis of protein mixtures  
M. H. Allen, D. J. Grindstaff, M. L. Vestal & R. W. Nelson  
954

Mass spectrometry software for biochemical analysis in electrospray and fast atom bombardment modes  
957

colloquium: Regulation of Retroviral Gene Expression

Retroviral RNA packaging  
A. M. L. Lever, J. H. Richardson & G. P. Harrison  
963

colloquium: Bioenergetics — What Should We Teach and How Should We Teach it?

Introducing bioenergetics in the first year  
J. M. Wrigglesworth  
967

Integration of catabolism and anabolism in microbial systems  
D. W. Tempest  
972

Phototrophic bacteria — useful organisms for class experiments  
J. B. Jackson  
976

Using the bacterium, Paracoccus denitrificans and other ‘runaway mitochondria’ as classroom models for respiratory electron transport studies  
B. Bolgiano, H. C. Davies & R. K. Poole  
976

The protonmotive force and the problem of the P/O ratio; some teaching considerations  
S. J. Ferguson  
982

colloquium: Enzymology in vivo

Enzymology in vivo  
K. M. Brindle  
985

Metabolic organization and the ultrastructure of animal cells  
J. S. Clegg  
986

N.m.r. studies of muscle glycogen synthesis in normal and non-insulin-dependent diabetic subjects  
D. L. Rothman, R. G. Shulman & G. I. Shulman  
992

N.m.r. studies of phospholipid metabolism and cell proliferation  
G. K. Radia, R. M. Dixon & C. A. Wood  
995

A combined n.m.r. and molecular biological approach to studying enzymes in vivo  
K. M. Brindle, S. E. C. Davies & S.-P. Williams  
997

Is there tight channelling in the tricarboxylic acid cycle metabolon?  
B. Sumegi, A. D. Sherry, C. R. Malloy, C. Evans & P. A. Srere  
1002
Physical and biological properties of keratan sulphate proteoglycan

Proteoglycan: collagen interactions and corneal ultrastructure

**Colloquium: Autocoid and Hormone Receptors: Rational Drug Design**

Rational methods for site-directed drug design: novel approaches for the discovery of potential ligands

Intracellular recognition sites for inositol 1,4,5-triphosphate and inositol 1,3,4,5-tetrakis-phosphate

Nuclear hormone receptors and rational drug discovery

Role of ligand in oestrogen-receptor function

Development of novel oestrogen-receptor antagonists

Design of ligands for the glucocorticoid and progestin receptors

Tachykinin receptor antagonists and potential clinical applications at peripheral level

Cholecystokinin receptors: synthetic antagonists with selectivity for receptor subtypes and possible clinical applications

**Colloquium: Biological Mass Spectrometry**

The structural domains in the E2 component of the pyruvate dehydrogenase multienzyme complex from Bacillus stearothermophilus

Laser-desorption-ionization Fourier-transform ion-cyclotron-resonance (LDI-FT-ICR) mass spectrometry (m.s.) of bacterial oligosaccharides

The study of intact proteins and glycoproteins by electrospray m.s.

Pyrolysis mass spectrometry of polysaccharides

Some biochemical applications of electrospray-magnetic sector mass spectrometry

Application of electrospray ionization mass spectrometry and tandem mass spectrometry in combination with capillary electrophoresis for biochemical investigations

</table>
Difference in patterns of proteins isolated from polysomes in free, cytoskeleton-bound and membrane-bound fractions in MPC-II cells incubated with insulin

Inhibition by p-bromophenacyl bromide of microtubule assembly in vitro

Tubulin:tyrosine ligase activity in regenerating peripheral nerve

The largest neurofilament component assembles in non-neuronal cells (fibroblasts), but is not phosphorylated

Calcium-induced degradation of the lens cytoskeleton

Association of pp60c-src with the cytoskeleton upon platelet activation

Morphological changes in adherent cells induced by Clostridium difficile toxins

Restricted efflux of the type II isoform of cyclic AMP-dependent protein kinase in permeabilized rat hepatocytes

High-molecular-mass complexes of the regulatory subunits of cyclic AMP-dependent protein kinase
Biochemistry of the eye

Collagen and ageing in Bruch's membrane

Ultrastructural characterization of normal and pathological human scleral proteoglycans

R. D. Young, W. Karwatowski, E. Smith, R. H. Grey & D. Wong

Extraction of the intact form of type IX collagen from mammalian vitreous

P. N. Bishop, D. McLeod & S. Ayad

Mucins synthesized in organ culture of human conjunctival tissue

A. P. Corfield, N. Myerscough, M. Berry, J. R. Clamp & D. L. Easty

Proteoglycan-collagen interactions in chronic superficial keratitis in the dog

D. L. Williams, A. Crabb & J. E. Scott

Differential effect of oxygen supply and lactate concentration on keratan sulphate and glycosaminoglycuronan production in bovine cornea

C. Baldini, G. de Luca, A. Passi, R. Rindi, R. Salvini & J. E. Scott

Autocoid and hormone receptors: rational drug design

Kinetic analysis of halothane-induced Ca^{2+} release from isolated heavy sarcoplasmic reticulum

J. French & J. J. A. Heffron

Relaxin and cAMP in rat uterus in vivo

A. McLwraith, S. J. Downing & M. Hollingsworth

An alternative interpretation of multiple-affinity agonist binding to β-adrenoceptors

Stimulation of prostaglandin E2 binding to a murine macrophage cell line (P388D1) by insulin

A. K. Dutta-Roy, M. G. Rae, A. S. Milton & D. Rotondo

Control of starch and sucrose metabolism in leaf and storage tissues

Binding saturation analysis of inositol-1,4,5-trisphosphate in suspension cultures of lucerne cells

C. J. Cooke, C. J. Smith, R. P. Newton & T. J. Walton

Alpha-amylase isoenzymes in aged wheat aleurone layers

M. A. Livesley & C. M. Bray

The extracellular matrix in health and disease

An assessment of the efficacy of anti-integrin α subunit monoclonal antibody production using affinity purified β1-integrin dimers as immunogen

Relationship between the secretion of cysteine proteinases and their inhibitors and malignant potential

J. W. J. van der Stappen, C. Paraskeva, A. C. Williams & A. Hague & R. A. Maciewicz

Iodoacacetate action on articular cartilage chondrocytes

R. M. Mason & D. C. L. Goh

Effect of oxygen tension on 35S-glycosaminoglycan synthesis and UDP-sugar pool size in articular cartilage

G. E. Henderson & R. M. Mason

The aromatic zipper: a model for the initial trimerization event in collagen folding

A. Brass, K. E. Kaider, J. T. Thomas, M. E. Grant & R. P. Boot-Handford

Use of the polymerase chain reaction to amplify and clone α-chains of bovine collagen IV

Kidney levels of mRNA encoding S and B2 laminin and \( \alpha_1(IV) \) collagen in diabetic rats fed an aldose reductase inhibitor

Maintenance of collagen IV expression by bovine retinal pericytes isolated directly onto Matrigel film

Effects of hyperglycaemic conditions on basement-membrane gene expression in cultured cells

Novel methods for the study of cell–collagen interactions

Recombinant human and dog procollagenases. Purification and characterization

Purification of recombinant dog tissue inhibitor of metalloproteinases

Primary amino-acid sequence of rabbit osteocalcin

Partial characterization of rat bone lysozyme

Type IX collagen in synovial fluids

Changes in the distribution of mammalian cartilage collagens with age

Physical studies on the protein core of skin dermatan sulphate proteoglycan II (decorin)

T-cell responses to human cartilage antigens in patients with inflammatory joint disease

Types II, VI and IX collagens in normal and osteoarthrotic human articular cartilage

LDV: a novel cell adhesion motif recognized by the integrin \( \alpha 4 \beta 1 \)

The role of integrin \( \alpha 6 \beta 4 \) in hemidesmosomes of human amnion

Severe Osteogenesis Imperfecta: Type I collagen abnormalities in 17 skin fibroblast cell lines

Studies on microfibrils of developing bovine elastic tissues

Type VI collagen forms a structural association with hyaluronan in vivo

A collagenase-sensitive glycoprotein identified in foetal bovine cell cultures

Deglycosylation of cartilage proteoglycans and their T-cell responses

Isolation of calcium-binding proteins by immobilized metal affinity chromatography

A dye-binding assay for soluble elastin

Evaluation of a new, rapid collagen assay
**N.m.r. spectroscopy of Ca\(^{2+}\)-heparin suggests delocalized binding of the cation**
D. Grant, W. F. Long & F. B. Williamson 390S

**Ca\(^{2+}\)-heparin interaction investigated polarimetrically**
D. Grant, C. F. Moffat, W. F. Long & F. B. Williamson 391S

**A relationship between cation-induced changes in heparin optical rotation and heparin-cation association constants**
D. Grant, C. F. Moffat, W. F. Long & F. B. Williamson 392S

**Optical rotation changes in chemically modified heparins as a guide to anionic groups involved in Ca\(^{2+}\) binding**
D. Grant, C. F. Moffat, W. F. Long & F. B. Williamson 393S

**Carboxylate symmetric stretching frequencies and optical rotation shifts of heparin-cation complexes**
D. Grant, C. F. Moffat, W. F. Long & F. B. Williamson 394S

**I.r. spectroscopic analysis of heparin-polypeptide interaction**
D. Grant, W. F. Long & F. B. Williamson 395S

**Effect of physiological pressure on the secretion of cysteine proteinases and their inhibitors from articular cartilage**
R. A. Maciewicz, A. C. Hall & J. P. G. Urban 396S

### Biological mass spectrometry

**Analysis of kinetic parameters of cyclic nucleotide phosphodiesterase systems by fast atom bombardment tandem mass spectrometry**

### Regulation of retroviral gene expression

**Differential effect of Coxsackie B4 virus on murine pancreatic islet preproinsulin mRNA and glyceraldehyde-3-phosphate dehydrogenase mRNA**
N. D. Portwood, M. J. Clemens & K. W. Taylor 398S

### Bioenergetics — what should we teach and how should we teach it?

**The place of bioenergetics in the modular biochemistry course in the School of Biological Sciences at Manchester**
R. P. F. Gregory 399S

**Brighter bioenergetics!**
B. S. Brown 400S

**Redox enzymes: a model coupled system**
M. T. Heydemann 401S

### Enzymology in vivo

**Indirect measurement of betaine-homocysteine methyltransferase activity using \(^1\)H n.m.r. spectroscopy**
S. Burns, A. Johnson & R. A. Iles 402S

**Evidence for a protein X-like domain at the N-terminus of the E1 component of the mammalian 2-oxoglutarate dehydrogenase complex**
J. E. Rice & J. G. Lindsay 403S

### General topics

**Lactobacillus cell walls and their arthritis-inducing effects in rats**
B. U. Archer, J. S. Thompson & P. J. Warne 404S
Computer simulations of the effect of glycosylation on the conformational freedom of peptides

Solid phase synthesis of monosaccharide-containing N-glycopeptides

Erythrocyte 2,3 DPG in normal volunteers, asthmatics and cigarette smokers

Species differences in lithium-sodium countertransport rate

Proton gradient-dependent active transport of L-lactate in basal plasma membrane vesicles isolated from syncytiotrophoblast human placenta

Ubiquitination of smooth muscle calpain II catalytic subunit

Comparison of inhibitory effects of lithium and magnesium on longitudinal smooth muscle contraction

Binding of zona pellucida glycoproteins to sperm proacrosin

Purification of food grade pectinase from K. marxianus

Application of approach to equilibrium analytical ultracentrifugation (Archibald method) to the determination of molecular weights of humic substances

The preparation and characteristics of immunoliposomes for targeting to tumour cells (A 431)

The preparation and characterization of proteoliposomes for targeting to oral bacteria

Single half-turnovers of the glucose transporter of the human erythrocyte

Inactivation of the nucleoside transporter of the human erythrocyte by dimethyl (2-hydroxy-5-nitrobenzyl) sulphonium bromide

The use of nested PCR and Southern blotting to confirm the presence of actin in Plasmodium yoelli

Differential responsiveness of receptor tyrosylkinases to inhibitors: Analysis of insulin and epidermal growth factor receptor sensitivity in cultured rat hepatocytes

Renal pH regulation in hypertension

The effects of essential fatty acid supplementation on lithium absorption kinetics in guinea pig jejunum

Effects of pancuronium and vecuronium on plasma levels of lactate dehydrogenase and creatine kinase in patients undergoing gynaecological surgery
Generation and metabolism of Ins(1,4,5)P₃ in SH-SYSY human neuroblastoma cells: The regulatory role of Ca²⁺
D. G. Lambert, R. J. H. Wojcikewicz & S. R. Nahorski

Isolation of microperoxisomes from human colonic mucosa

Menaquinone-mediated free radical generation: a possible mutagenic mechanism

Exchange of inhibitors and proteases at tumour cell surfaces
F. S. Steven, M. M. Griffin, N. J. Bulleid & B. S. Brown

Studies on a toxin produced by the cyanobacterium Phormidium persicinum
R. A. Lincoln, K. Strupinski & J. M. Walker

Enzyme inhibitors from algae
R. A. Lincoln, K. Strupinski & J. M. Walker

Preparation of phenylalanine-deuterated, and totally ¹⁵N-enriched, calmodulins from Trypanosoma brucei, and its application in drug binding studies

Effects of methylazoxymethanol treatment on the GABAergic synaptosomes in the P2 fraction from developing mouse cerebellum
E. Bacon, C. Girard, J. de Barry & G. Gombos

The application of mass spectrometry in the study of labile natural products
K. J. van der Merwe, S. S. de Kock, P. Swart & L. Fourie

Daily energy expenditure in human subjects
J. Haslam & M. Banner

Assessment of phosphotidylcholine (PC12) liposomes
D. J. Doherty & J. A. Houghton

Effects of different de-endothelializing injuries to the rabbit carotid artery on glycosaminoglycan content and sulphonation during early wound healing
M. W. C. Hatton & M. Richardson

Biochemical analysis of Papaver somniferum (opium poppy)
R. Yasmin & A. M. Naru

Replication of the human immunodeficiency virus type I is inhibited in human cells with antisense RNA expression
G. Szczakiel, K. Rittner, M. Homann & M. Pawlita

Replication of the human immunodeficiency virus type I is inhibited by the adeno-associated virus rep gene
K. Rittner, R. Heibronn, J. A. Kleinschmidt, I. Oelze & G. Szczakiel

Integrin-dependent platelet recognition sites in collagen: Indentification of a short platelet-reactive sequence in the type III-derived fragment αI(III)CB3
L. F. Morton, L. S. Zienah, I. Y. McCulloch, C. G. Knight, M. J. Humphries & M. J. Barnes

Characterization and regulation of angiotensin receptors in a rat intestinal epithelial cell line
R. D. Smyth & K. D. Brown

Biochemical changes in liver function due to prolonged administration of Co-protoporphyrin
R. Beri & R. Chandra

Monitoring of the in situ thymine photo-adduct using u.v. irradiated DNA antibody f(ab)ᵦ fragment
G. U. Gurudutta, U. P. S. Chauhan, V. K. Jain & R. Chandra

Catalase activity in cultured human retinal pigment epithelial cells
W. G. Unger, M. E. Boulton, S. Petal & J. P. Goldsmith
