Ciba Medal Lecture

Chromosomal Abnormalities in Cancer Cells: Identification of Molecules Important for Tumour Development

T. H. Rabbits

809

Colloquia

647th Meeting, Sheffield

Colloquium: The New Biology of Protein Synthesis

Ribosome frameshifting at hungry codons: sequence rules, directional specificity and possible relationship to mobile element behaviour

J. Gallant and D. Lindsley

817

Probing the mechanism of ribosomal frameshifting on viral RNAs

I. Brierley

822

Recognition of UGA as a selenocysteine codon in eukaryotes: a review of recent progress

M. J. Berry and P. R. Larsen

832

Conserved features of selenoprotein P cDNA

K. E. Hill, R. S. Lloyd and R. F. Burk

835

Codon usage: mutational bias, translational selection, or both?

P. M. Sharp, M. Stenico, J. F. Peden and A. T. Lloyd

841

Major codon preference: theme and variations

C. G. Kurland

846

Codon context effects on nonsense suppression in human cells

D. Hughes and I. Tubulekas

851

Ternary complex-ribosome interaction: its influence on protein synthesis and on growth rate

M. F. Tuite, I. Stansfield, L. Eurwilaichitr and A. Khmaloka

857

Novel ribosome-associated translation factors are required to maintain the fidelity of translation in yeast

J. P. Tassan, X. Le Goff, R. Le Guellec and M. Philipe

862

Colloquium: Signalling from the Plasma Membrane to the Nucleus

Structure of G-protein-linked receptors

J. B. C. Findlay, D. Donnelly, N. Bhogal, C. Hurrell and T. K. Attwood

869
Phosphatidylcholine hydrolysis: a source of multiple lipid messenger molecules

Unclear or nuclear: another role for the phosphatidylinositol cycle?

Nuclear localization of protein kinase C

Important roles for novel protein phosphatases dephosphorylating serine and threonine residues

Role of p21C in growth factor signal transduction

Cytoplasmic to nuclear signal transduction by mitogen-activated protein kinase and 90 kDa ribosomal S6 kinase

p70S6k/p85S6: mechanism of activation, effects of rapamycin and role in mitogenesis

Roles of glycogen synthase kinase-3 in signal transduction

Signalling to chromatin and the superinduction of proto-oncogenes

Nuclear response to cyclic AMP: central role of transcription factor CREM (cyclic-AMP-responsive-element modulator)

Organization of RNA polymerase II transcription and pre-mRNA splicing within the mammalian cell nucleus

Cyclins and their associated cyclin-dependent kinases in the human cell cycle

Control of nuclear factor-kB DNA-binding activity by inhibitory proteins containing ankyrin repeats

Transcription factor phosphorylation by the DNA-dependent protein kinase

Disruption of cell-cycle control by viral oncoproteins

DRTF1/E2F transcription factor: an integrator of cell-cycle events with the transcriptional apparatus

colloquium: Immunoglobulin Superfamily Interactions

Three-dimensional structure and thermodynamics of antigen binding by antilysozyme antibodies

Structure-function studies of CD2 by n.m.r. and mutagenesis
### Analysis of the structure and interactions of CD2
S. J. Davis, E. Y. Jones, D. L. Bodian, A. N. Barclay and P. A. van der Merwe

### Structural studies of CD4: crystal structure of domains 3 and 4 and their implication for the overall receptor structure
R. L. Brady, G. Lange and A. N. Barclay

### Modelling study of IgE/receptor interactions
E. A. Padlan and B. A. Helm

### Structural basis of the IgE-FCeRI interaction

### IgG receptors that resemble class I major histocompatibility complex antigens
N. E. Simister

### Function of CD48 and its regulation by Epstein–Barr virus
D. A. Thorley-Lawson, C. Ianello, L. D. Klaman, D. Staunton and S. Yokoyama

---

Molecular genetic analysis of azole antifungal mode of action
Resistance of *Candida albicans* to azole antifungal agents
Resistance to azole fungicides in the field
Biochemical characterization of tobacco mutants resistant to azole fungicides and herbicides
Cytochrome P-450 as a target for therapeutic inhibitors
Insect cytochrome P-450: metabolism and resistance to insecticides
Potentiation of pesticide toxicity in birds: role of cytochrome P-450
Plant cytochrome P-450 and agricultural biotechnology
Efficiency and substrate specificity of *Streptomyces griseolus* cytochromes P-450SUI and P-450SU2 mono-oxygenase reactions
Microbial transformations of steroids
Heterologous expression of cytochrome P-450 in *Escherichia coli*

**colloquium: Abzymes**

Polyclonal catalytic antibodies
Catalytic antibodies: the rerouting of chemical reactions
Production of catalytic antibodies using combinatorial libraries
Catalytic antibodies: designed and accidental
Catalytic antibodies for the hydrolysis of unactivated peptides

**colloquium: Cross-talk between Receptors and Intracellular Second Messenger Systems**

Interactions between co-existing β-adrenoceptor subtypes in continuous cell lines
Adenosine and somatostatin potentiate the α₁-adrenergic activation of phospholipase C in striatal astrocytes through a mechanism involving arachidonic acid and glutamate
Direct and indirect responses to metabotropic glutamate receptor activation in the brain

Coupling of histamine H₁ and adenosine A₁ receptors to phospholipase C in DDT,MF-2 cells: synergistic interactions and regulation by cyclic AMP

Receptor-mediated intracellular signalling: oscillations and waves of cytosolic calcium

Conditional regulation of adenylyl cyclases by G-protein βγ-subunits

Second messenger and ionic modulation of agonist-stimulated phosphoinositide turnover in airway smooth muscle

Amplifying interactions between spasmogens in vascular smooth muscle

Cross-talk between receptors and intracellular second messenger systems

The effect of three calmodulin antagonists on K⁺-stimulated neurotransmitter release from rat cortical slices
J. Dunlop, C. Ennis, M. C. W. Minchin and J. Rossiter
416S

Cromoglycate selectively inhibits a rat liver microsomal lipid antioxidant system which is triggered by the cellular energy charge
T. Gandamhareja, T. Hallinan, J. Gor and C. Rice-Evans
417S
Cromoglycate markedly activates ascorbate-ADP-initiated lipid peroxidation in washed rat liver microsomes  

T. Gandamhardja, T. Hallinan, J. Gor and C. Rice-Evans  

418S

Relative anticonvulsant potencies of CPP and some novel analogues in the kindled rat  

419S

Bradykinin-evoked release of [3H]noradrenaline from the human neuroblastoma SH-SYSY  

420S

Inhibition of platelet responses by N,N-diethyl-2-[4-(phenoxy)methyl]phenoxy]-ethanamine·HCl (DPPE) occurs though multiple mechanisms  

D. M. Salmond  

421S

Calphostin C inhibits endothelial cell proliferation and selectively modulates cell-surface marker expression  

B. D. Edwards, M. A. Slevin, A. J. Dickson, A. Ager and F. W. Ballardie  

422S

Antiproliferative actions of cyclosporin A on endothelial cells are not exerted through protein kinase C (Ptk)  

B. D. Edwards, M. A. Slevin, A. J. Dickson, A. Ager and F. W. Ballardie  

423S

The use of a biotin-labelled amine to identify endogenous substrates of transglutaminase in pancreatic islets  

P. A. Smethurst, P. J. Bungay and M. Griffin  

424S

Inositol phospholipid turnover in digitonin-permeabilized dispersed mouse pancreatic islet cells  

A. M. Kardasz, K. Capito, P. Thams and C. J. Hedekov  

425S

Activation of potassium channels by diazoxide and cromakalim in insulin-secreting cells is dependent upon internal ADP and channel run-down  

J. H. Jaggar, E. A. Harding, B. A. Ayton, and M. J. Dunne  

426S

Effects of 5-hydroxydecanoate on ATP-regulated potassium ion channels in insulin-secreting cells  

J. H. Jaggar, P. E. Squires and M. J. Dunne  

427S

The involvement of protein kinase C in glucose-stimulated insulin secretion  

S. J. Perusal and P. M. Jones  

428S

Growth hormone decreases the amount of glucose transporter proteins in rat adipocyte plasma membranes  

E. Kilgour, S. A. Baldwin and D. J. Flint  

429S

Modulation of cyclic AMP-dependent protein kinase activity by drugs affecting human platelet aggregation  

S. A. Saeed, M. J. Javed and G. Ashraf  

430S

Carbachol-stimulated CAMP formation in SH-SYSY cells is dependent on both extracellular and intracellular calcium  

R. A. Hirst and D. G. Lambert  

431S

Growth hormone suppresses the expression of G, in rat adipocytes  

R. Doris, R. G. Vernon, M. D. Houslay and E. Kilgour  

432S

Regulation of membrane potential by G-protein-coupled receptors in L6 skeletal myocytes: the role of second messengers  

M. Gosling, J. W. Smith and D. R. Poyner  

433S

Stimulation of chloride secretion and adenylate cyclase secretion in human colonic-derived cell lines by calcitonin-gene-related peptide  

434S

A nitric oxide synthase inhibitor reduces desensitization of bradykinin-induced activation of phospholipase C in sensory neurones  

J. S. Harvey and G. M. Burgess  

435S
Tyrosine phosphorylation of proteins during ‘priming’ of neutrophils

D. Lloyds, N. P. J. Brindle and M. B. Hallett

General topics

Annexins in porcine heart

T. Luckuck and J. H. Walker

Insulin-stimulated glucose uptake in C2C12 myoblasts

D. Mangnall, C. Bruce and R. B. Fraser

Insulin-like growth factor stimulation of inorganic phosphate transport into skeletal muscle

A positron annihilation lifetime study of protein hydration

Regulation of sugar transport in chicken enterocytes

Evidence for polymorphism in mosquito esterases involved in insecticide resistance

Comparisons of nucleic acid sequences of esterases from resistant and susceptible strains of Culex quinquefasciatus

The function of esterases in insecticide resistance in Culex quinquefasciatus mosquitoes from Sri Lanka

Simultaneous real-time correlation of drug effects on dopamine efflux and uptake in rat striatal slices

Canine ocular mucins in health and dry eye disease

Application of breath pentane analysis to monitor age-related change in free radical activity

Purine nucleotide content in leukocytes from patients with B-chronic lymphocytic leukaemia

Effect of streptozotocin-induced diabetes on magnesium inhibition of contractions of the rat uterus and G.I. tract

Purification of plasma membrane rat liver phosphatidylserine decarboxylase

Isozymes of rat brain myelin phospholipid-N-methyltransferase

The identification of several stearoyl-arachidonyl-selective diacylglycerol kinases in the particulate fraction of porcine testes

Changes in the activities and cellular localization of phospholipases in differentiating HL-60 cells

The regulation of agonist-stimulated phospholipase D activity in Swiss 3T3 fibroblasts

A role for phospholipase D activation in B cell activation

Epidermal growth factor and insulin stimulate MAP kinase activity in cultured hepatocytes

Second messenger interactions in the rat adrenal cortex

The antigen receptors on B and T cells are not coupled to cytosolic phospholipase A₂ activation and arachidonic acid release

Agonist activation of transfected human M1 muscarinic acetylcholine receptor in Chinese hamster ovary cells results in concurrent downregulation of Gqα and G11α
