Wellcome Trust Award Lecture

Glycobiology: “Towards Understanding the Function of Sugars”

R. A. Dwek

Morton Lecture

Inositol Evolution: What can it tell us about Functions?

R. F. Irvine

colloquia

652nd Meeting Canterbury

colloquium: The Neuronal Cytoskeleton

Phosphorylation of microtubule-associated protein 1B and axonal growth

P. R. Gordon-Weeks, M. Johnstone and M. Bush

The phosphatidylinositol-binding site of microtubule-associated protein MAP2

R. G. Burns and C. D. Surridge

Changes in microtubule-associated protein 1B during development of the nervous system

R. A. Calvert

Subcellular targeting of the retrograde motor cytoplasmic dynein

A60, an axonal membrane-skeletal spectrin-binding protein

N. V. L. Hayes, F. E. Holmes, J. Grantham and A. J. Baines

The post-synaptic density: putative involvement in synapse stabilization via cadherins and covalent modification by ubiquitination

Synapsin I and the cytoskeleton: calmodulin regulation of interactions

A. J. Baines, K.-M. Chan and R. Goold

Neuronal aspects of cytosolic chaperonin complexes: structures implicated in the production of functional cytoskeletal proteins

M. J. Carden and A. Roobol

Post-translational modifications of microtubule- and growth-associated proteins in nerve regeneration and neuropathy

W. G. McLean, R. E. Roberts and F. H. Mullings

Tau protein in Alzheimer’s disease

M. Goedert, R. Jakes, M. G. Spillantini, R. A. Crowther, P. Cohen, E. Vanmechelen, A. Priorst, J. Gotz and K. Burki
Determinants of ligand binding at the D₂ dopamine receptor

The metabotropic glutamate receptors: their second intracellular loop plays a critical role in the G-protein coupling specificity

Tachykinin non-peptide antagonists: binding domain and molecular mode of action

Defining the ligand-binding site for vasopressin receptors: a peptide mimetic approach

Allosteric regulation of G-protein-linked receptors

Four ways of being an agonist: multiple sequence determinants of efficacy at D₂ dopamine receptors

Palmitoylation of G-protein-coupled receptors: a dynamic modification with functional consequences

Signalling and regulation of the α₁b-adrenergic receptor

Variability in the regulation of β-adrenoceptor subtypes

Interactions between the Gᵢ/protein kinase A and the Ras/MAP-kinase signalling pathways

Differential signal transduction by six splice variants of the pituitary adenylate cyclase-activating peptide (PACAP) receptor

Use of antisense oligodeoxynucleotides and monospecific antisera to inhibit G-protein gene expression in cultured neurons

The role of G-protein βγ subunits in signal transduction

Molecular mechanisms of regulation of phosphoinositol 3-kinase by insulin, insulin-like growth factor 1 and nerve growth factor in PC12 cells

Protein kinase C (PKC)-induced PKC degradation: a model for down-regulation

Receptor regulation of G protein palmitoylation
Mechanisms of protein prenylation and role in G protein function

Mechanisms of agonist-induced G-protein elimination

P. J. Casey

G. Milligan, A. Wise, D. J. MacEwan, M. A. Grasse,
F. R. Kennedy, T. W. Lee, E. J. Ade, G. D. Kim,
J. F. McCallum, A. Burt, I. C. Carr, P. Svoboda,
B. H. Shah and I. Mullane

161

166

colloquium: Glycobiology of Proteins

Monitoring and control of recombinant glycoprotein heterogeneity in animal cell cultures

Novel glycosylation routes for glycoproteins: the laddINAc pathway

Expression and secretion of glycoproteins by hyphal fungi

The carbohydrate-deficient glycoprotein syndrome: an experiment of nature in glycosylation

Mutational analysis of the epitopes recognized by anti-(rat CD2) and anti-(rat CD48) monoclonal antibodies

N. Jenkins

D. H. van den Eijnden, A. P. Neeleman,
W. van der Knaap, H. Bakker, M. Agterberg and I. van Die
