Biochemical Society Award Lectures

Genes in food – why the furore?

B. Dixon

299–306

How to (or not to) communicate science

S.P.R. Rose

307–312

Biochemical Society Main Meeting

678th Meeting, Imperial College, London, 16–18 December 2002

Colloquia

Society Host/Glycobiology Group Joint Colloquium Sulphotransferases in Glycobiology

Edited by **J. Turnbull (Birmingham)**, **T. Corfield (Bristol)** and **A. Dell (Imperial College London)**

Sponsored by Dextra Laboratories Limited and Sigma-Aldrich

Sulphated endothelial ligands for L-selectin in lymphocyte homing and inflammation

A. van Zante and S.D. Rosen

313–317

Sulphotransferases acting on mucin-type oligosaccharides

I. Brockhausen

318–325

Glycoprotein hormone GalNAc-4-sulphotransferase

J.U. Baenziger

326–330

Heparan sulphate N-sulphotransferase activity: reaction mechanism and substrate recognition

Y. Kakuta, L. Li, L.C. Pedersen, L.G. Pedersen and M. Negishi

331–334

Chondroitin sulphate proteoglycans in the central nervous system: changes and synthesis after injury

F. Properzi, R.A. Asher and J.W. Fawcett

335–336

Interaction between glial-cell-line-derived neurotrophic factor (GDNF) and 2-O-sulphated heparin-related glycosaminoglycans

C.C. Rider

337–339

Glucosaminyl N-deacetylase/N-sulphotransferases in heparan sulphate biosynthesis and biology

L. Kjellén

340–342

Heparan sulphate sulphotransferase expression in mice and *Caenorhabditis elegans*

J. Turnbull, K. Drummond, Z. Huang, T. Kinnunen, M. Ford-Perriss, M. Murphy and S. Guimond

343–348

Research Colloquium

Biological Functions of Sulphated Glycoproteins

Edited by J. Turnbull (Birmingham), T. Corfield (Bristol) and A. Dell (Imperial College London)

A gravimetric analysis of protein–oligosaccharide interactions

T. Rudd, J.T. Gallagher, D. Ron, R.J. Nichols and D.G. Fernig

349–351

Hepatocyte growth factor/scatter factor and its interaction with heparan sulphate and dermatan sulphate

K. Catlow, J.A. Deakin, M. Delehedde, D.G. Fernig, J.T. Gallagher, M.S.G. Pavão and M. Lyon

352–353

A Colloquium

Polyamines and Their Role in Human Disease

Edited by H.M. Wallace (Aberdeen, Scotland)

Polyamines and their role in human disease – an introduction

H. M. Wallace

354–355

Transgenic mouse models for studies of the role of polyamines in normal, hypertrophic and neoplastic growth

A.E. Pegg, D.J. Feith, L.Y.Y. Fong, C.S. Coleman, T.G. O'Brien and L.M. Shantz

356–360

The role of polyamine catabolism in anti-tumour drug response

R.A. Casero, Jr, Yanlin Wang, T.M. Stewart, W. Devereux, A. Hacker, Yongchun Wang, R. Smith and P.M. Woster

361–365

Polyamine dependence of normal cell-cycle progression

S.M. Oredsson

366–370

Acrolein produced from polyamines as one of the uraemic toxins

K. Sakata, K. Kashiwagi, S. Sharmin, S. Ueda and K. Igarashi

371–374

Polyamines and prostatic cancer

R.G. Schipper, J.C. Romijn, V.M.J.I. Cuijpers and A.A.J. Verhofstad

375–380

Polyamines and colon cancer

V. Milovic and L. Turchanowa

381–383

Polyamine-reduced diet in metastatic hormone-refractory prostate cancer (HRPC) patients

B. Cipolla, F. Guillé and J.-P. Moulinoux

384–387

Polyamines as modifiers of genetic risk factors in human intestinal cancers

N. Babbar and E.W. Gerner

388–392

Polyamine analogues as anticancer drugs

H.M. Wallace and A.V. Fraser

393–396

Polyamines and novel polyamine conjugates interact with DNA in ways that can be exploited in non-viral gene therapy

I.S. Blagbrough, A.J. Geall and A.P. Neal

397–406

The biological activities of new polyamine derivatives as potential therapeutic agents P. Kong Thoo Lin, A.M. Dance, C. Bestwick and L. Milne	407–410
Turnover of trypanosomal ornithine decarboxylases L. Persson, A. Jeppsson and S. Nasizadeh	411–414
Polyamine biosynthetic enzymes as drug targets in parasitic protozoa O. Heby, S.C. Roberts and B. Ullman	415–419
Polyamine metabolism in the Microsporidia C.J. Bacchi, N. Yarlett and L.M. Weiss	420–423
Translational regulation of the plant S-adenosylmethionine decarboxylase C. Hanfrey, M. Franceschetti, M.J. Mayer, C. Illingworth, K. Elliott, M. Collier, B. Thompson, B. Perry and A.J. Michael	424–427
<hr/>	
Industrial Biochemistry and Biotechnology Group Colloquium	
Drug Discovery and Design	
Edited by D.E. Kelly (Aberystwyth, Wales) and A. Clark (Organon)	
<i>Sponsored by DiscoverRx Corporation Ltd.</i>	
<hr/>	
Modern approaches to drug discovery and design: setting the scene D.E. Kelly and A. Clark	428
Genomics in target and drug discovery M. van Duin, H. Woolson, D. Mallinson and D. Black	429–432
The role of therapeutic antibodies in drug discovery L.H. Stockwin and S. Holmes	433–436
A new paradigm for drug discovery: integrating clinical, genetic, genomic and molecular phenotype data to identify drug targets E.E. Schadt, S.A. Monks and S.H. Friend	437–443
<hr/>	
The Biochemical Society and British Society for Research on Aging Joint Colloquium	
Human Ageing: From the Bench to the Clinic	
Edited by R. Aspinall (Imperial College London), J. Lord (Birmingham) and Y. Barrett (Coleraine)	
<hr/>	
A study of mitochondrial DNA mutations in peripheral lymphocytes in an aging cohort B. Zhang, S. Ye, A.A. Sayer, S.R. Hammans, S. Adio, L.J. Hinks, P.J. Smythe, D. Groot, C. Cooper and I.N.M. Day	444–446
Effects of age on antibody affinity maturation D.K. Dunn-Walters, M. Banerjee and R. Mehr	447–448
Effect of age on susceptibility to post-traumatic infection in the elderly S.K. Butcher, V. Killampalli, H. Chahal, E. Kaya Alpar and J.M. Lord	449–451
Critique of the demographic evidence for 'late-life non-senescence' A.D.N.J. de Grey	452–454
Skeletal muscles of aged male mice fail to adapt following contractile activity A. Vasilaki, L. Iwanejko, F. McArdle, C.S. Broome, M.J. Jackson and A. McArdle	455–456

Centenarians as a model for healthy aging
C. Franceschi and M. Bonafè **457–461**

Osteoporosis: pathogenesis and clinical intervention
G. Mueller and R.G.G. Russell **462–464**

Regulation in Metabolism Group Colloquium
Proteasome Interactions with Viral and Cellular Proteins

Edited by J. Rivett (Bristol) and M. Allday (Imperial College London)

An interaction map of proteasome subunits
O. Coux **465–469**

Proteasomal interactors control activities as diverse as the cell cycle
and glutaminergic neurotransmission
K. Rezvani, M. Mee, S. Dawson, J. McIlhinney, J. Fujita and R.J. Mayer **470–473**

The ubiquitin proteolytic system and pathogenesis of human diseases:
a novel platform for mechanism-based drug targeting
A. Ciechanover **474–481**

Protecting p53 from degradation
S. Laín **482–485**
