## GlaxoSmithKline Award Lecture

**Molecular mousetraps and the serpinopathies**  
321–330

---

## Biochemical Society Focused Meetings

### Proteases and their Inhibitors in Neurodegenerative Disease  
Royal Institute of British Architects, London, U.K., 17 November 2004

*Edited by H. Nagase and J. Saklatvala (Imperial College London, U.K.)*

<table>

<tbody>
<tr>
<td>Roles of proteolysis and lipid rafts in the processing of the amyloid precursor protein and prion protein</td>
<td>N.M. Hooper</td>
<td>335–338</td>
</tr>
</tbody>
</table>

### Kinases in Diabetes  
Hulme Hall, University of Manchester, U.K., 11 November 2004

*Edited by D. Smith, E. Kilgour and M. Coghlan (AstraZeneca UK)  
Sponsored by AstraZeneca UK*

<table>
<thead>

<tbody>
<tr>
<td>Introduction to the Kinases in Diabetes Biochemical Society focused meeting: are protein kinases good targets for antidiabetic drugs?</td>
<td>M.P. Coghlan and D.M. Smith</td>
<td>339–342</td>
</tr>
<tr>
<td>Therapeutic challenges of kinase and phosphatase inhibition and use in anti-diabetic strategy</td>
<td>A.J. Bridges</td>
<td>343–345</td>
</tr>
<tr>
<td>Atypical protein kinase C in insulin action and insulin resistance</td>
<td>R.V. Farese, M.P. Sajan and M.L. Standaert</td>
<td>350–353</td>
</tr>
<tr>
<td>Insulin signal transduction in human skeletal muscle: identifying the defects in Type II diabetes</td>
<td>M. Björnholm and J.R. Zierath</td>
<td>354–357</td>
</tr>
<tr>
<td>Modulation of insulin signalling by insulin sensitizers</td>
<td>G. Jiang and B.B. Zhang</td>
<td>358–361</td>
</tr>
</tbody>
</table>
### AMP-activated protein kinase and the metabolic syndrome

*L.G.D. Fryer and D. Carling* 362–366

### PDH kinase inhibitors: a novel therapy for Type II diabetes?

*R.M. Mayers, B. Leighton and E. Kilgour* 367–370

### Small molecule glucokinase activators as novel anti-diabetic agents

*B. Leighton, A. Atkinson and M.P. Coghlan* 371–374

### Plant Signalling from Genes to Biochemistry

**Kelvin Gallery, Glasgow, U.K., 11–12 November 2004**

*Edited by J. Milner and H. Nimmo (Glasgow, U.K.)*

*Sponsored by Kendro*

- **Before and beyond ABA: upstream sensing and internal signals that determine ABA accumulation and response under abiotic stress**
  *P.E. Verslues and J.-K. Zhu* 375–379

- **Storage reserve mobilization in germinating oilseeds: Arabidopsis as a model system**
  *S. Penfield, S. Graham and I.A. Graham* 380–383

- **The molecular biology of appressorium turgor generation by the rice blast fungus Magnaporthe grisea**

- **Serpentine plant MLO proteins as entry portals for powdery mildew fungi**
  *R. Panstruga* 389–392

- **Post-translational regulation in plants employing a diverse set of polypeptide tags**
  *B. Downes and R.D. Vierstra* 393–399

### Irish Area Section Meeting

**Inflammation and Haemostasis**

**Coleraine, Northern Ireland, 12–13 October 2004**

*Edited by D. Zister (Dublin, Ireland), D. Croke (Royal College of Surgeons in Ireland), D. Timson (Belfast, Northern Ireland), G. Walsh (Limerick, Ireland), J. McCarthy (Cork, Ireland), K. Ohlendeck (Maynooth, Ireland), M. Moran (International Biometric Industry Association, U.S.A.), M. Carty (Galway, Ireland), P. Newsholme (Dublin, Ireland), R. Devery (Dublin, Ireland) and W. Gilmore (Ulster, Northern Ireland)*

- **Coagulation inhibitors in inflammation**
  *C.T. Esmon* 401–405

- **Soluble adhesion molecules in inflammatory and vascular diseases**
  *J.C. Giddings* 406–408

- **Using proteomics to identify potential therapeutic targets in platelets**
  *P.B. Maguire, M. Foy and D.J. Fitzgerald* 409–412
Harnessing wound healing and regeneration for tissue engineering
A.D. Metcalfe and M.W.J. Ferguson 413–417

The role of blood cells and their microparticles in blood coagulation
K.-E. Eilertsen and B. Østerud 418–422

Polyunsaturated fatty acids and inflammation
P.C. Calder 423–427

Haemostasis in normal pregnancy: a balancing act?
V.A. Holmes and J.M.W. Wallace 428–432
