Novartis Medal Lecture

Rho GTPases and the control of cell behaviour

A. Hall

891–895

Keilin Memorial Lecture

The efficiency and plasticity of mitochondrial energy transduction

M.D. Brand

897–904

Focus Topics at BioScience2005

Mechanistic and Functional Studies of Proteins

SECC Glasgow, U.K., 17–21 July 2005

Edited by **S. Crosthwaite (Manchester, U.K.), M. Ginger (Oxford, U.K.), K. Gull (Oxford, U.K.), A. Lee (Southampton, U.K.), H. McWatters (Oxford, U.K.), J. Mottram (Glasgow, U.K.), P. Rich (University College London, U.K.), C. Robinson (Warwick, U.K.) and H. van Veen (Cambridge, U.K.)**

Lipid interactions with bacterial channels: fluorescence studies

A.M. Powl, J. Carney, P. Marius, J.M. East and A.G. Lee

905–909

Simulation studies of the interactions between membrane proteins and detergents

P.J. Bond, J. Cuthbertson and M.S.P. Sansom

910–912

Spectroscopic studies of phospholamban variants in phospholipid bilayers

J.C. Clayton, E. Hughes and D.A. Middleton

913–915

Molecular simulations and lipid–protein interactions: potassium channels and other membrane proteins

M.S.P. Sansom, P.J. Bond, S.S. Deol, A. Grotleski, S. Haider and Z.A. Sands

916–920

Binding sites of lipophilic quinone and quinone analogue inhibitors in the cytochrome *b₆f* complex of oxygenic photosynthesis

W.A. Cramer, H. Zhang, J. Yan and G. Kurisu

921–923

Lipids in and around photosynthetic reaction centres

P.K. Fyfe and M.R. Jones

924–930

Quantification of the effects of melittin on liposome structure

J. Popplewell, N. Freeman, S. Carrington, G. Ronan, C. McDonnell and R. Ford

931–933

Reaction mechanism and phospholipid structures of bovine heart cytochrome <i>c</i> oxidase S. Yoshikawa	934–937
Specific protein–lipid interactions in membrane proteins C. Hunte	938–942
Organ specificity in the circadian control of plant gene expression S. Sullivan, M. Shenton and H.G. Nimmo	943–944
The co-ordination of central plant metabolism by the circadian clock J. Hartwell	945–948
Synchronizing the <i>Neurospora crassa</i> circadian clock with the rhythmic environment N. Price-Lloyd, M. Elvin and C. Heintzen	949–952
Degradation of the <i>Neurospora</i> circadian clock protein FREQUENCY through the ubiquitin–proteasome pathway Q. He and Y. Liu	953–956
Organization of endogenous clocks in insects C. Helfrich-Förster	957–961
Zebrafish circadian clocks: cells that see light T.K. Tamai, A.J. Carr and D. Whitmore	962–966
The extraordinary mitochondrion and unusual citric acid cycle in <i>Trypanosoma brucei</i> J.J. van Hellemond, F.R. Opperdoes and A.G.M. Tielens	967–971
Implications of a genomic search for autophagy-related genes in trypanosomatids D.J. Rigden, M. Herman, S. Gillies and P.A.M. Michels	972–974
Post-genomic views of a ‘unique’ metabolism in the eukaryotic flagellum M.L. Ginger	975–976
<i>Plasmodium falciparum</i> possesses organelle-specific α -keto acid dehydrogenase complexes and lipoylation pathways S. Günther, P.J. McMillan, L.J.M. Wallace and S. Müller	977–980
Maintaining the protective variant surface glycoprotein coat of African trypanosomes G. Rudenko	981–982
The <i>myo</i> -inositol-1-phosphate synthase gene is essential in <i>Trypanosoma brucei</i> K.L. Martin and T.K. Smith	983–985
What the genome sequence is revealing about trypanosome antigenic variation J.D. Barry, L. Marcello, L.J. Morrison, A.F. Read, K. Lythgoe, N. Jones, M. Carrington, G. Blandin, U. Böhme, E. Caler, C. Hertz-Fowler, H. Renauld, N. El-Sayed and M. Berriman	986–989
A molecular understanding of the catalytic cycle of the nucleotide-binding domain of the ABC transporter HlyB J. Zaitseva, S. Jenewein, C. Oswald, T. Jumpertz, I.B. Holland and L. Schmitt	990–995

Crystallographic and single-particle analyses of native and nucleotide-bound forms of the cystic fibrosis transmembrane conductance regulator (CFTR) protein N.H. Awayn, M.F. Rosenberg, A.B. Kamis, L.A. Aleksandrov, J.R. Riordan and R.C. Ford	996–999
ABC proteins and antibiotic drug resistance: is it all about transport? I.D. Kerr, E.D. Reynolds and J.H. Cove	1000–1002
Control of the CFTR channel's gates P. Vergani, C. Basso, M. Mense, A.C. Nairn and D.C. Gadsby	1003–1007
Similarities between ATP-dependent and ion-coupled multidrug transporters H. Venter, S. Shahi, L. Balakrishnan, S. Velamakanni, A. Bapna, B. Woebking and H.W. van Veen	1008–1011
Do protein–lipid interactions determine the recognition of transmembrane helices at the ER translocon? S.H. White and G. von Heijne	1012–1015
Pathways for protein transport to seed storage vacuoles N.A. Jolliffe, C.P. Craddock and L. Frigerio	1016–1018
Protein import into mitochondria D. Mokranjac and W. Neupert	1019–1023
The complexity of pathways for protein import into thylakoids: it's not easy being green A. Di Cola, E. Klostermann and C. Robinson	1024–1027
<hr/>	
Proteins in Disease	
SECC Glasgow, U.K., 17–21 July 2005	
Edited by B. Austen (St George's Hospital Medical School, London, U.K.), C. Connolly (Dundee, U.K.), B. Irvine (Belfast, U.K.), M. Sugden (Queen Mary, London, U.K.) and V. Zammit (Hannah Research Institute, Ayr, U.K.)	
<hr/>	
Leptin: a potential cognitive enhancer? J. Harvey, L.J. Shanley, D. O'Malley and A.J. Irving	1029–1032
Insulin and cholesterol pathways in neuronal function, memory and neurodegeneration T.J. Nelson and D.L. Alkon	1033–1036
Insulin and cognitive function in humans: experimental data and therapeutic considerations M.W.J. Strachan	1037–1040
Increased risk of Alzheimer's disease in Type II diabetes: insulin resistance of the brain or insulin-induced amyloid pathology? G.J. Biessels and L.J. Kappelle	1041–1044
Adipose tissue function in the insulin-resistance syndrome F. Karpe and G.D. Tan	1045–1048
Adipose tissue changes in obesity S.W. Coppack	1049–1052

<p>Mouse models of PPAR-γ deficiency: dissecting PPAR-γ's role in metabolic homoeostasis S.L. Gray, E. Dalla Nora and A.J. Vidal-Puig</p>	1053–1058
<p>Regulation of lipid metabolism via angiopoietin-like proteins S. Kersten</p>	1059–1062
<p>Role of malonyl-CoA in the hypothalamic control of food intake and energy expenditure M.D. Lane, Z. Hu, S.-H. Cha, Y. Dai, M. Wolfgang and A. Sidhaye</p>	1063–1067
<p>Diet-induced obesity in the Sprague–Dawley rat: dietary manipulations and their effect on hypothalamic neuropeptide energy balance systems J.G. Mercer and Z.A. Archer</p>	1068–1072
<p>Diseases of adipose tissue: genetic and acquired lipodystrophies J. Capeau, J. Magré, O. Lascols, M. Caron, V. Béréziat, C. Vigouroux and J.P. Bastard</p>	1073–1077
<p>Signalling role of adipose tissue: adipokines and inflammation in obesity P. Trayhurn and I.S. Wood</p>	1078–1081
<p>Protein aggregation, metals and oxidative stress in neurodegenerative diseases B.J. Tabner, O.M.A. El-Agnaf, M.J. German, N.J. Fullwood and D. Allsop</p>	1082–1086
<p>The role of cell-derived oligomers of Aβ in Alzheimer's disease and avenues for therapeutic intervention D.M. Walsh, I. Klyubin, G.M. Shankar, M. Townsend, J.V. Fadeeva, V. Betts, M.B. Podlisny, J.P. Cleary, K.H. Ashe, M.J. Rowan and D.J. Selkoe</p>	1087–1090
<p>Protein lipidation of BACE R.B. Parsons and B.M. Austen</p>	1091–1093
<p>Glycosylation and misfolding of PrP F. Wiseman, E. Cancellotti and J. Manson</p>	1094–1095
<p>Expression and activity of β-site amyloid precursor protein cleaving enzyme in Alzheimer's disease J.A. Johnston, W.W. Liu, S.A. Todd, D.T.R. Coulson, S. Murphy, G.B. Irvine and A.P. Passmore</p>	1096–1100
<p>Aβ-degrading enzymes: modulators of Alzheimer's disease pathogenesis and targets for therapeutic intervention E.A. Eckman and C.B. Eckman</p>	1101–1105
<p>α-Synuclein aggregation in neurodegenerative diseases and its inhibition as a potential therapeutic strategy K.E. Paleologou, G.B. Irvine and O.M.A. El-Agnaf</p>	1106–1110
<p>Structure and neurotoxicity of novel amyloids derived from the BRI gene G. Gibson, O.M.A. El-Agnaf, Z. Anwar, C. Sidera, A. Isbister and B.M. Austen</p>	1111–1112
<p>Studies of the aggregation of an amyloidogenic α-synuclein peptide fragment J. Madine, A.J. Doig, A. Kitmitto and D.A. Middleton</p>	1113–1115
<p>Novel heparan sulphate analogues: inhibition of β-secretase cleavage of amyloid precursor protein S.J. Patey, E.A. Yates and J.E. Turnbull</p>	1116–1118

Research Colloquia at BioScience2005

Research Colloquia

SECC Glasgow, U.K., 17–21 July 2005

Edited by **F. Antoni (Edinburgh, U.K.), C. Cooper (Essex, U.K.) and M. Schweizer (Heriot-Watt, U.K.)**

- Negative feedback in NO/cGMP signalling
D. Koesling, F. Mullershausen, A. Lange, A. Friebe, E. Mergia, C. Wagner and M. Russwurm 1119–1122
- Reactive oxygen species (ROS)-mediated β -cleavage of the prion protein in the mechanism of the cellular response to oxidative stress
N.T. Watt and N.M. Hooper 1123–1125
- Inhibition of pro-inflammatory cytokine receptor signalling by cAMP in vascular endothelial cells
W.A. Sands and T.M. Palmer 1126–1128
- Novel tissue remodelling roles for human recombinant erythropoietin
P.J. Coussons, S. Baig, C. Fanutti and R. Grant 1129–1130
- Compartmentation of G-protein-coupled receptors and their signalling components in lipid rafts and caveolae
P.A. Insel, B.P. Head, H.H. Patel, D.M. Roth, R.A. Bunday and J.S. Swaney 1131–1134
- Expression cloning of novel regulators of 92 kDa type IV collagenase expression
R.R. Nair and D.D. Boyd 1135–1136
- Atypical L-type channels are down-regulated in hypoxia
L. Callinan, T.V. McCarthy, Y. Maulet and J.J. Mackrill 1137–1139

Independent Meeting

Seventh Yeast Lipid Conference

Swansea Clinical School, Swansea, Wales, U.K., 12–14 May 2005

Edited by **D. Kelly, S. Kelly and D. Lamb (Swansea, U.K.)**

- Protein and lipid motifs regulate phosphatidylserine traffic in yeast
D.R. Voelker 1141–1145
- The contributions of biosynthesis and acyl chain remodelling to the molecular species profile of phosphatidylcholine in yeast
H.A. Boumann and A.I.P.M. de Kroon 1146–1149
- Regulation of phospholipid synthesis in yeast by zinc
G.M. Carman 1150–1153
- In *Saccharomyces cerevisiae*, impaired PRPP synthesis is accompanied by valproate and Li⁺ sensitivity
S. Vavassori, K. Wang, L.M. Schweizer and M. Schweizer 1154–1157

Deficiency in mitochondrial anionic phospholipid synthesis impairs cell wall biogenesis Q. Zhong and M.L. Greenberg	1158–1161
Mitochondrial fatty acid synthesis and maintenance of respiratory competent mitochondria in yeast J.K. Hiltunen, F. Okubo, V.A.S. Kursu, K.J. Autio and A.J. Kastaniotis	1162–1165
Using genomic and lipidomic strategies to investigate sphingolipid function in the yeast heat-stress response L.A. Cowart and Y.A. Hannun	1166–1169
Signalling functions for sphingolipid long-chain bases in <i>Saccharomyces cerevisiae</i> K. Liu, X. Zhang, C. Sumanasekera, R.L. Lester and R.C. Dickson	1170–1173
Formation and mobilization of neutral lipids in the yeast <i>Saccharomyces cerevisiae</i> A. Wagner and G. Daum	1174–1177
Interactions of the ergosterol biosynthetic pathway with other lipid pathways M. Veen and C. Lang	1178–1181
Homoeostatic systems for sterols and other lipids J. Garbarino and S.L. Sturley	1182–1185
<i>Saccharomyces cerevisiae</i> , a model to study sterol uptake and transport in eukaryotes S. Reiner, D. Micolod and R. Schneiter	1186–1188
Enzyme redesign and interactions of substrate analogues with sterol methyltransferase to understand phytosterol diversity, reaction mechanism and the nature of the active site W.D. Nes	1189–1196
Single amino acid exchanges in FAD-binding domains of squalene epoxidase of <i>Saccharomyces cerevisiae</i> lead to either loss of functionality or terbinafine sensitivity C. Ruckenstein, A. Eidenberger, S. Lang and F. Turnowsky	1197–1201
Access of the substrate to the active site of squalene and oxidosqualene cyclases: comparative inhibition, site-directed mutagenesis and homology-modelling studies S. Oliaro-Bosso, T. Schulz-Gasch, S. Taramino, M. Scaldaferrri, F. Viola and G. Balliano	1202–1205
Two mutants selectively resistant to polyenes reveal distinct mechanisms of antifungal activity by nystatin and amphotericin B I. Hapala, V. Klobučniková, K. Mazáňová and P. Kohút	1206–1209
Azole susceptibility and resistance in <i>Candida dubliniensis</i> E. Pinjon, G.P. Moran, D.C. Coleman and D.J. Sullivan	1210–1214
Regulation of sterol metabolism in <i>Candida albicans</i> by the <i>UPC2</i> gene T.C. White and P.M. Silver	1215–1218
Membrane raft lipid constituents affect drug susceptibilities of <i>Candida albicans</i> R. Pasrija, T. Prasad and R. Prasad	1219–1223
