# Biochemical Society Annual Symposium No. 76

## DNA Damage: from Causes to Cures

Edited by Richard Bowater (University of East Anglia, U.K.), Rhona Borts (Leicester, U.K.) and Malcolm White (St. Andrews, U.K.).

### DNA Damage: from Causes to Cures
Richard P. Bowater, Rhona H. Borts and Malcolm F. White 479–481

## GlaxoSmithKline Award Lecture

The DNA-damage response: new molecular insights and new approaches to cancer therapy

Stephen P. Jackson 483–494

## Colworth Medal Lecture

Control of genome stability by Slx protein complexes

John Rouse 495–510

## Sir Frederick Gowland Hopkins Memorial Lecture

Functions of p53 in metabolism and invasion

Karen H. Vousden 511–517

## Novartis Medal Lecture

The search for a human Holliday junction resolvase

Stephen C. West 519–526
The associations of sequence variants in DNA-repair and cell-cycle genes with cancer risk: genotype–phenotype correlations
Janet Hall, Virginie Marcel, Celeste Bolin, Marie Fernet, Laurence Tartier, Laurence Vaslin and Pierre Hainaut 527–533

Biochemical properties of mammalian TREX1 and its association with DNA replication and inherited inflammatory disease
Tomas Lindahl, Deborah E. Barnes, Yun-Gui Yang and Peter Robins 535–538

Repairing DNA double-strand breaks by the prokaryotic non-homologous end-joining pathway
Nigel C. Brissett and Aidan J. Doherty 539–545

Structure, function and evolution of the XPD family of iron–sulfur-containing 5′ → 3′ DNA helicases
Malcolm F. White 547–551

Genomic instability and cancer: lessons from analysis of Bloom’s syndrome
Miranda Payne and Ian D. Hickson 553–559

Regulation of activation-induced cytidine deaminase DNA deamination activity in B-cells by Ser38 phosphorylation
Uttiya Basu, Andrew Franklin, Bjoern Schwer, Hwei-Ling Cheng, Jayanta Chaudhuri and Frederick W. Alt 561–568

The impact of heterochromatin on DSB repair
Aaron A. Goodarzi, Angela T. Noon and Penny A. Jeggo 569–576

Short-patch single-strand break repair in ataxia oculomotor apraxia-1
John J. Reynolds, Sherif F. El-Khamisy and Keith W. Caldecott 577–581

A molecular model for drug binding to tandem repeats of telomeric G-quadruplexes
Shozeb M. Haider and Stephen Neidle 583–588

The role of recombination in telomere length maintenance

Understanding the functions of BRCA1 in the DNA-damage response
Maximina H. Yun and Kevin Hiom 597–604

PCNA on the crossroad of cancer
Ivaylo Stoimenov and Thomas Helleday 605–613
