## Colworth Medal Lecture

Coupling of the NMDA receptor to neuroprotective and neurodestructive events

**Giles E. Hardingham**

**1147–1160**

## Biochemical Society Focused Meetings

### **Molecular and Cellular Mechanisms of Angiogenesis**

University of Chester, Chester, U.K., 15–17 July 2009

**Edited by Ian Zachary (University College London, U.K.) and Sreenivasan Ponnambalam (Leeds, U.K.).**

Unique signal transduction of the VEGF family members VEGF-A and VEGF-E

**Masabumi Shibuya**

**1161–1166**

VEGF resistance as a molecular basis to explain the angiogenesis paradox in diabetes mellitus

**Johannes Waltenberger**

**1167–1170**

The role of neuropilins in cell signalling

**Ian C. Zachary, Paul Frankel, Ian M. Evans and Caroline Pellet-Many**

**1171–1178**

Protease-activated receptors, cyclo-oxygenases and pro-angiogenic signalling in endothelial cells

**Caroline P.D. Wheeler-Jones, Charlotte Farrar and Elena Garonna**

**1179–1183**

VEGF receptor trafficking in angiogenesis

**Alice Scott and Harry Mellor**

**1184–1188**

A role for protein ubiquitination in VEGFR-2 signalling and angiogenesis

**Nader Rahimi**

**1189–1192**

VEGF-A-stimulated signalling in endothelial cells via a dual receptor tyrosine kinase system is dependent on co-ordinated trafficking and proteolysis

**Alexander F. Bruns, Leyuan Bao, John H. Walker and Sreenivasan Ponnambalam**

**1193–1197**

Gene therapy with vascular endothelial growth factors

**Seppo Ylä-Herttuala**

**1198–1200**

The heparin-binding domain confers diverse functions of VEGF-A in development and disease: a structure–function study

**Dominik Krilleke, Yin-Shan Eric Ng and David T. Shima**

**1201–1206**

The anti-angiogenic isoforms of VEGF in health and disease <b>Yan Qiu, Coralie Hoareau Aveilla, Sebastian Oltean, Steven J. Harper and David O. Bates</b>	<b>1207–1213</b>
Functionally defining the endothelial transcriptome, from Robo4 to ECSCR <b>Ana Raquel Verissimo, John M.J. Herbert, Victoria L. Heath, John A. Legg, Helen Sheldon, Maud Andre, Rajeeb Kumar Swain and Roy Bicknell</b>	<b>1214–1217</b>
Thymosin $\beta$ 4 induces epicardium-derived neovascularization in the adult heart <b>Paul R. Riley and Nicola Smart</b>	<b>1218–1220</b>
Notch signalling in ischaemia-induced angiogenesis <b>Ayman Al Haj Zen and Paolo Madeddu</b>	<b>1221–1227</b>
Neuropilin ligands in vascular and neuronal patterning <b>Alessandro Fantin, Charlotte H. Maden and Christiana Ruhrberg</b>	<b>1228–1232</b>
VEGFRs and Notch: a dynamic collaboration in vascular patterning <b>Lars Jakobsson, Katie Bentley and Holger Gerhardt</b>	<b>1233–1236</b>
Can the biology of VEGF and haem oxygenases help solve pre-eclampsia? <b>Asif Ahmed and Melissa J. Cudmore</b>	<b>1237–1242</b>
<b>Selected oral communications</b>	
The DDAH/ADMA pathway in the control of endothelial cell migration and angiogenesis <b>Lorna R. Fiedler and Beata Wojciak-Stothard</b>	<b>1243–1247</b>
Regulation of angiogenesis by ETS transcription factors <b>Anna M. Randi, Andrea Sperone, Nicola H. Dryden and Graeme M. Birdsey</b>	<b>1248–1253</b>
ERK5 and the regulation of endothelial cell function <b>Owain Llŷr Roberts, Katherine Holmes, Jürgen Müller, Darren A.E. Cross and Michael J. Cross</b>	<b>1254–1259</b>

---

## Gene Expression in Neuronal Disease

University of Cardiff, Cardiff, U.K., 16–18 July 2009

**Edited by Nicola Gray (MRC Human Reproductive Sciences Unit, Edinburgh, U.K.), Lesley Jones (Cardiff, U.K.) and Ian Wood (Leeds, U.K.).**

---

Gene Expression in Neuronal Disease <b>Ian C. Wood, Nicola K. Gray and Lesley Jones</b>	<b>1261–1262</b>
Unravelling neurogenetic networks implicated in developmental language disorders <b>Sonja C. Vernes and Simon E. Fisher</b>	<b>1263–1269</b>
Transcriptional dysregulation of coding and non-coding genes in cellular models of Huntington's disease <b>Angela Bithell, Rory Johnson and Noel J. Buckley</b>	<b>1270–1275</b>
Whole genome expression as a quantitative trait <b>John Hardy, Danyah Tratzuni and Mina Ryten</b>	<b>1276–1277</b>
High-throughput sequencing methods to study neuronal RNA–protein interactions <b>Jernej Ule</b>	<b>1278–1280</b>

Pathogenic mechanisms of myotonic dystrophy <b>Johanna E. Lee and Thomas A. Cooper</b>	<b>1281–1286</b>
Gene expression networks: competing mRNA decay pathways in mammalian cells <b>Lynne E. Maquat and Chenguang Gong</b>	<b>1287–1292</b>
eEF1A2 and neuronal degeneration <b>Catherine M. Abbott, Helen J. Newbery, Charlotte E. Squires, David Brownstein, Lowri A. Griffiths and Dinesh C. Soares</b>	<b>1293–1297</b>
Protein synthesis and its control in neuronal cells with a focus on vanishing white matter disease <b>Graham D. Pavitt and Christopher G. Proud</b>	<b>1298–1310</b>
<b>Selected oral communication</b>	
Splicing, <i>cis</i> genetic variation and disease <b>Cathy J. Jensen, Brian J. Oldfield and Justin P. Rubio</b>	<b>1311–1315</b>
<hr/>	
<b>Neuronal Glutamate and GABA<sub>A</sub> Receptor Function in Health and Disease</b> University of St Andrews, St Andrews, U.K., 21–24 July 2009	
<b>Edited by Chris Connolly and Jenni Harvey (Dundee, U.K.).</b>	
<hr/>	
Neuronal Glutamate and GABA <sub>A</sub> Receptor Function in Health and Disease <b>Peter R. Moulton</b>	<b>1317–1322</b>
Fractionating spatial memory with glutamate receptor subunit-knockout mice <b>David M. Bannerman</b>	<b>1323–1327</b>
Role of GABA <sub>A</sub> receptors in cognition <b>Hanns Möhler</b>	<b>1328–1333</b>
The physiological properties and therapeutic potential of $\alpha_5$ -GABA <sub>A</sub> receptors <b>Loren J. Martin, Robert P. Bonin and Beverley A. Orser</b>	<b>1334–1337</b>
Use of concatamers to study GABA <sub>A</sub> receptor architecture and function: application to $\delta$ -subunit-containing receptors and possible pitfalls <b>Erwin Sigel, Kuldeep H. Kaur, Benjamin P. Lüscher and Roland Baur</b>	<b>1338–1342</b>
Locating GABA in GABA receptor binding sites <b>Sarah C.R. Lummis</b>	<b>1343–1346</b>
Single-channel properties of <i>N</i> -methyl-D-aspartate receptors containing chimaeric GluN2A/GluN2D subunits <b>Timothy O'Leary and David J.A. Wyllie</b>	<b>1347–1354</b>
The role of GABA <sub>A</sub> R phosphorylation in the construction of inhibitory synapses and the efficacy of neuronal inhibition <b>Mansi Vithlani and Stephen J. Moss</b>	<b>1355–1358</b>
Neuronal calcium sensors and synaptic plasticity <b>Mascia Amici, Andrew Doherty, Jihoon Jo, David Jane, Kwangwook Cho, Graham Collingridge and Sheila Dargan</b>	<b>1359–1363</b>

Regulation of glutamate receptor trafficking by leptin <b>Peter R. Moulton and Jenni Harvey</b>	1364–1368
Regulation of NMDA receptor Ca <sup>2+</sup> signalling and synaptic plasticity <b>C. Geoffrey Lau, Koichi Takeuchi, Alma Rodenas-Ruano, Yukihiro Takayasu, Jessica Murphy, Michael V.L. Bennett and R. Suzanne Zukin</b>	1369–1374
Activity-dependent gene transcription as a long-term influence on receptor signalling <b>Donna M. McDade, Ann-Marie Conway, Allan B. James and Brian J. Morris</b>	1375–1377
Plasticity of the $\alpha_4\beta\delta$ GABA <sub>A</sub> receptor <b>Hui Shen and Sheryl S. Smith</b>	1378–1384
Spare respiratory capacity, oxidative stress and excitotoxicity <b>David G. Nicholls</b>	1385–1388
Rapid dendritic and axonal responses to neuronal insults <b>Sarah M. Mizielinska, Sam M. Greenwood, Hemanth Tummala and Christopher N. Connolly</b>	1389–1393
<b>Selected oral communications</b>	
Positive allosteric activation of GABA <sub>A</sub> receptors bi-directionally modulates hippocampal glutamate plasticity and behaviour <b>Guofu Shen, Mahmoud S. Mohamed, Paromita Das and Elizabeth I. Tietz</b>	1394–1398
RNA editing and its impact on GABA <sub>A</sub> receptor function <b>Chammiran Daniel and Marie Öhman</b>	1399–1403
RDL receptors <b>Ian McGonigle and Sarah C.R. Lummis</b>	1404–1406
Ca <sup>2+</sup> -dependent modulation of GABA <sub>A</sub> and NMDA receptors by extracellular ATP: implication for function of tripartite synapse <b>Ulyana Lalo, Jemma Andrew, Oleg Palygin and Yuriy Pankratov</b>	1407–1411
Cortical excitability and post-stroke recovery <b>Andrew N. Clarkson and S. Tomas Carmichael</b>	1412–1414
<i>GABRB2</i> in schizophrenia and bipolar disorder: disease association, gene expression and clinical correlations <b>Jianhuan Chen, Shui-Ying Tsang, Cun-You Zhao, Frank W. Pun, Zhiliang Yu, Lingling Mei, Wing-Sze Lo, Shisong Fang, Hua Liu, Gerald Stöber and Hong Xue</b>	1415–1418
Potential role for ligand-gated ion channels after seizure-induced neurogenesis <b>Ann Swijssen, Govert Hoogland and Jean-Michel Rigo</b>	1419–1422
Inhibition of recombinant GluN1/GluN2A and GluN1/GluN2B N-methyl-D-aspartate receptors by single malt whiskies <b>Hannah J. Otton, Ariane Janssen and David J.A. Wyllie</b>	1423–1425
