Biochemical Society Annual Symposium No. 77

Organelle Biogenesis and Positioning in Plants
University of Chester, U.K., 16–18 December 2009

Edited by David Evans and Chris Hawes (Oxford Brookes University, U.K.).

Organelle Biogenesis and Positioning in Plants
David E. Evans and Chris Hawes 729–732

Targeting proteins to the plant nuclear envelope
Iris Meier, Xiao Zhou, Jelena Brkljacić, Annkatrin Rose, Qiao Zhao and Xianfeng Morgan Xu 733–740

Nuclear envelope proteins and their role in nuclear positioning and replication
Katja Graumann, John Runions and David E. Evans 741–746

Networking in the endoplasmic reticulum
Lawrence R. Griffing 747–753

Trafficking of the cellulose synthase complex in developing xylem vessels
Raymond Wightman and Simon Turner 755–760

Biogenesis of the plant Golgi apparatus
Chris Hawes, Jennifer Schoberer, Eric Hummel and Anne Osterrieder 761–767

Tonoplast intrinsic proteins and vacuolar identity
Stefano Gattolin, Mathias Sorieul and Lorenzo Frigerio 769–773

Malaria, Plasmodium falciparum and its apicoplast
Ming Kalanon and Geoffrey I. McFadden 775–782

The complexity and evolution of the plastid-division machinery
Jodi Maple and Simon Geir Møller 783–788

Mitochondrial fusion, division and positioning in plants
David C. Logan 789–795

Plant dynamin-related protein families DRP1 and DRP2 in plant development
Sebastian Y. Bednarek and Steven K. Backues 797–806

Peroxisome biogenesis and positioning
Alison Baker, Imogen A. Sparkes, Laura-Anne Brown, Catherine O’Leary-Steele and Stuart L. Warriner 807–816

Peroxisome division and proliferation in plants
Kyaw Aung, Xinchun Zhang and Jianping Hu 817–822
Probing cytoplasmic organization and the actin cytoskeleton of plant cells with optical tweezers
Tijs Ketelaar, Hannie S. van der Honing and Anne Mie C. Emons 823–828

Relationships at the nuclear envelope: lamins and nuclear pore complexes in animals and plants
Jindriska Fiserova and Martin W. Goldberg 829–831

Motoring around the plant cell: insights from plant myosins
Imogen A. Sparkes 833–838

Correction 839
