Contents
Vol. 4, Part 1, 1976

560TH MEETING, OXFORD

Colloquium: Cell Surface Antigens
The biological significance, isolation and structure of histocompatibility antigens. By D. Snary, M. J. Crumpton, P. Goodfellow & W. F. Bodmer

Differentiation antigens of the lymphocyte cell surface. By A. F. Williams

Tumour antigens. By G. Klein

Colloquium: The Use of Perfusion and Related Techniques in Studying Nervous-Tissue Function
Release of physiologically active amino acids from intact brain and spinal-cord preparations. By J. F. Mitchell

A superfusion system for long-term studies on cerebral cortex in vivo. By P. R. Dodd & H. F. Bradford

Continuous determination of 3H-labelled 3,4-dihydroxyphenethylamine (dopamine) synthesis and release in the cat caudate nucleus in vivo. By A. Chéramy, J. Glowinski, M. J. Besson & C. Gauchy

Measurements of arteriovenous differences in the study of substrate supply to the brain. By D. H. Williamson

Colloquium: Immunoglobulin Allotypes: Structure and Regulation of their Expression
Structural localization of human immunoglobulin allotypes. By M. W. Turner

Structural studies on rabbit immunoglobulin allotypes. By L. E. Mole

Immunoglobulin allotypes of the mouse. By D. W. Dresser, K. D. Keeler & J. M. Phillips

Chicken immunoglobulin allotypes. By R. Pink

Rat immunoglobulin allotypes: Expression by thymus-independent cells. By S. V. Hunt & E. Duvall

A possible control by regulatory allelic genes of allotypic expression. By A. D. Strosberg

Communications
Lipid composition of Acer pseudoplatanus (sycamore) cells and some aspects of their ultrastructure during growth in batch suspension culture. By N. S. de Silva & M. W. Fowler

Threonine as a preferred source of 2-carbon units for lipid synthesis in Trypanosoma brucei. By R. A. Klein & D. J. Linstead

Biosynthesis of phosphatidylcholine and phosphatidylethanolamine by germinating soya bean. By J. L. Harwood

Vol. 4
A partial reaction of δ-aminolaevulinate synthetase from *Rhodopseudomonas spheroides*. By A. Laghai & P. M. Jordan 52

5'-Nucleotidase in liver plasma membrane and in the serum of normal and jaundiced rats. By F. S. Issa, B. M. Mullock & R. Hinton 55

Cholesterogenesis from tritiated water in rats: Evidence against the existence of diurnal rhythms (1. Temporal effects). By R. Fears & B. Morgan 58

Cholesterogenesis from tritiated water in rats: Evidence against the existence of diurnal rhythms (2. Effect of meal-feeding). By R. Fears & B. Morgan 60

Age-related changes in the respiratory control ratio of rat liver mitochondria after brief exposure to hypo-osmotic media. By M. C. Barrett & A. A. Horton 64

Synthesis of 50S ribosomes in a mutant of *Escherichia coli*. By F. Markey, P. F. G. Sims & D. G. Wild 66

Gene expression and its modification. By S. Lewin 68

High-molecular-weight folates of rat liver. By P. A. Barford, J. A. Blair & F. J. Staff 70

Hydrolytic rupture of ascorbate by adenosine 3':5'-cyclic monophosphate phosphodiesterase. By S. Lewin 71

Production of the superoxide radical by horseradish peroxidase. By B. Halliwell & S. Ahluwalia 73

Polyamine oxidase from the leaves of cereals. By T. A. Smith, W. L. Haygarth & J. F. Williams 74

Reconstitution in vitro of nitrate reductase from apoprotein of molybdenum-deficient spinach. By G. Rucklidge, B. Notton & E. Hewitt 77

Folding-pathway selection or cross-linking as the cause of thermal stabilization of yeast invertase conformation by its mannan. By J. Woodward & A. Wiseman 80

The kinetics of effector-induced association–dissociation reactions of phosphofructokinase. By P. F. Liddle, D. Ardron, D. J. Jacobs & G. L. Kellett 87

Organization of oligomycin-sensitive adenosine triphosphatase. By M. D. Partis, E. Bertoli, S. Mascarello & D. E. Griffiths 88

The protonmotive force, the phosphate potential and respiratory control: The p-zone interpretation. By G. P. R. Archbold, C. L. Farrington, A. M. McKay & F. H. Malpress 91

Concentrations of phenylalanine and tyrosine in plasma and brain of rats treated with phenylalanine loads. By K. N. Antonas & W. F. Coulson 94

Changes in serum tryptophan, tryptophan binding to serum albumin and serum total amino acid concentration after administration of neuroleptic drugs to rats. By D. A. Bender 98

Inhibition of unidirectional influx of glucose into the isolated perfused dog brain by cytochalasin B. By L. R. Drewes, D. D. Gilboe, A. L. Betz & R. W. Horton 100

1976
The time-course of the changes in the concentrations of some volatile fatty acids after administration of hypoglycin to rats. By D. Billington, H. Osmundsen & H. S. A. Sherratt

t-Butyldimethylsilyl derivatives in the gas chromatography–mass spectrometry of steroids. By S. J. Gaskell & C. J. W. Brooks

Stimulation of prostaglandin accumulation in the anterior pituitary by luliberin. By A. Betteridge, L. Bergeron & N. Barden

Pituitary involvement in the control of hepatic steroid metabolism in the rat. By P. Skett, J.-Å. Gustafsson, Å. Stenberg & A. Larsson

The effect of spermidine on the uptake of tryptophan and corticosteroids by the isolated perfused guinea-pig mammary gland. By A. R. Peters & T. B. Mepham

Effects of phenethylamine derivatives on the release of biogenic amines from synaptosomes. By M. R. Raiteri, A. Bertollini, R. del Carmine & G. Levi

An approach to cell-surface receptors in an amoeba-flagellate protozoon. By D. S. O'Dell, T. M. Preston, C. A. King & P. R. Gardiner

Isolation and comparison of the proenzyme and activated forms of the human serum complement subcomponents Clr and Cls. By R. B. Sim & R. R. Porter

Tumour regression with liposome-entrapped asparaginase: Some immunological advantages. By E. D. Neerunjun & G. Gregoriadis

The separation of rabbit allotypic b₄ immunoglobulin from b₄-negative immunoglobulin by affinity chromatography on immunoadsorbents prepared from cellulose trans-2,3-carbonate. By J. F. Kennedy, P. A. Keep & D. Catty

Possible cross-reactivity of human anti-mitochondria antibodies with membrane vesicles of Paracoccus denitrificans. By T. J. Sayers & H. Baum

The conjugation of arylacetic acids in the pigeon compared with the hen. By J. R. Idle, P. Millburn, R. T. Williams & G. Zini

Long-range effects of products of carbon tetrachloride-stimulated lipid peroxidation (by title only). By G. Ugazio, M. V. Torrielli, E. Burdino, B. Sawyer & T. F. Slater

The metabolism and binding of catecholamines by the hepatic microsomal fraction of the rat. By D. McKillop & G. Powis
