Biochemical Society Award

Calcium signalling remodelling and disease

Michael J. Berridge

297–309

Early Career Research Awards

Metabolic sensors and their interplay with cell signalling and transcription

Alena Krejčí

311–323

Dynamic clustering of IP₃ receptors by IP₃

Taufiq Rahman

325–330

Biochemical Society Focused Meetings

From Beads on a String to the Pearls of Regulation: the Structure and Dynamics of Chromatin

Wellcome Trust Genome Campus, Hinxton, Cambridge, U.K., 3–4 August 2011

Edited by Richard Bowater (University of East Anglia, U.K.), Ben Luisi (Cambridge, U.K.) and Ian Wood (Leeds, U.K.).

From Beads on a String to the Pearls of Regulation: the Structure and Dynamics of Chromatin

Richard P. Bowater, Ian C. Wood and Ben F. Luisi

331–334

DNA structure, nucleosome placement and chromatin remodelling: a perspective

Andrew A. Travers, Cédric Vaillant, Alain Arneodo and Georgi Muskhelishvili

335–340

H1 and HMGB1: modulators of chromatin structure Jean O. Thomas and Katherine Stott	341–346
Nucleosome recognition and spacing by chromatin remodelling factor ISW1a Timothy J. Richmond	347–350
Deciphering how the chromatin factor RCC1 recognizes the nucleosome: the importance of individuals in the scientific discovery process Song Tan	351–356
Histone transfer among chaperones Wallace H. Liu and Mair E.A. Churchill	357–363
Cancer and the bromodomains of BAF180 Peter M. Brownlee, Anna L. Chambers, Antony W. Oliver and Jessica A. Downs	364–369
Histone marks: repairing DNA breaks within the context of chromatin Kyle M. Miller and Stephen P. Jackson	370–376
Active nucleosome positioning beyond intrinsic biophysics is revealed by <i>in vitro</i> reconstitution Philipp Korber	377–382

Dynamics Within and Between Proteins

University of Essex, 31 August–2 September 2011

Edited by Christopher Cooper, Neil Kad, Jody Mason, Phil Reeves and Jon Worrall (University of Essex, U.K.).

Conserved activation pathways in G-protein-coupled receptors Xavier Deupi, Jörg Standfuss and Gebhard Schertler	383–388
Insights into the activation mechanism of the visual receptor rhodopsin Steven O. Smith	389–393
G-protein-coupled receptor dynamics: dimerization and activation models compared with experiment Bruck Taddese, Lisa M. Simpson, Ian D. Wall, Frank E. Blaney, Nathan J. Kidley, Henry S.X. Clark, Richard E. Smith, Graham J.G. Upton, Paul R. Gouldson, George Psaroudakis, Robert P. Bywater and Christopher A. Reynolds	394–399
Kinesin backsteps Nicholas J. Carter and Robert A. Cross	400–403
Structural insights into specificity and diversity in mechanisms of ubiquitin recognition by ubiquitin-binding domains Mark S. Searle, Thomas P. Garner, Joanna Strachan, Jed Long, Jennifer Adlington, James R. Cavey, Barry Shaw and Robert Layfield	404–408
Structural and dynamic aspects of Ca ²⁺ and Mg ²⁺ binding of the regulatory domains of the Na ⁺ /Ca ²⁺ exchanger Vincent Breukels, Wouter G. Touw and Geerten W. Vuister	409–414
Dynamics in transient complexes of redox proteins Marcellus Ubbink	415–418

Conformational dynamics and thermodynamics of protein–ligand binding studied by NMR relaxation Mikael Akke	419–423
Understanding how small helical proteins fold: conformational dynamics of Im proteins relevant to their folding landscapes Angelo Miguel Figueiredo, Geoffrey R. Moore and Sara B.-M. Whittaker	424–428
Morphogenesis of a protein: folding pathways and the energy landscape Maurizio Brunori, Stefano Gianni, Rajanish Giri, Angela Morrone and Carlo Travaglini-Allocatelli	429–432
The role of the extracellular loops of the CGRP receptor, a family B GPCR James Barwell, Michael J. Woolley, Mark Wheatley, Alex C. Conner and David R. Poyner	433–437
The mechanical properties of kinesin-1: a holistic approach George M. Jeppesen and J.K. Heinrich Hoerber	 438–443

Cellular Traffic of Lipids and Calcium at Membrane Contact Sites

Snowbird Ski and Summer Resort, Snowbird, UT, U.S.A., 6–9 October 2011

Edited by Tim Levine (Institute of Ophthalmology, London, U.K.) and William Prinz (National Institute of Diabetes and Digestive and Kidney Diseases, National Institutes of Health, Bethesda, MD, U.S.A.).

TheERMES complex and ER–mitochondria connections Agnès H. Michel and Benoît Kornmann	445–450
14-3-3 protein and ATRAP bind to the soluble class IIB phosphatidylinositol transfer protein RdgB β at distinct sites Shamshad Cockcroft and Kathryn Garner	451–456
Chloroplast lipid synthesis and lipid trafficking through ER–plastid membrane contact sites Zhen Wang and Christoph Benning	457–463
The relationship between ER–multivesicular body membrane contacts and the ESCRT machinery Emily R. Eden, Thomas Burgoyne, James R. Edgar, Alexander Sorkin and Clare E. Futter	464–468
The oxysterol-binding protein superfamily: new concepts and old proteins Michelle L. Villasmil, Vytas A. Bankaitis and Carl J. Mousley	469–473
