Biochemical Society/British Neuroscience Association
Focused Meeting

Astrocytes in Health and Neurodegenerative Disease

Edited by Jon Cooper (Institute of Psychiatry, King’s College London, U.K.), Diane Hanger (King’s College London, U.K.), Wendy Noble (King’s College London, U.K.), Michael Sofroniew (University of California Los Angeles, U.S.A.), Alexei Verkhratsky (University of Manchester, U.K.) and Brenda Williams (Institute of Psychiatry, King’s College London, U.K.).

The role of neuronal versus astrocyte-derived heparan sulfate proteoglycans in brain development and injury
Isabella Farhy Tselnicker, Matthew M. Boisvert and Nicola J. Allen 1263–1269

The non-cell-autonomous component of ALS: new in vitro models and future challenges
Laura Ferraiuolo 1270–1274

Exocytosis of gliotransmitters from cortical astrocytes: implications for synaptic plasticity and aging
Ulyana Lalo, Seyed Rasooli-Nejad and Yuriy Pankratov 1275–1281

Astrocytosis in infantile neuronal ceroid lipofuscinosisis: friend or foe?
Charles Shyng and Mark S. Sands 1282–1285

Interaction of neurons and astrocytes underlies the mechanism of Aβ-induced neurotoxicity
Plamena R. Angelova and Andrey Y. Abramov 1286–1290

Glia in the pathogenesis of neurodegenerative diseases
Alexei Verkhratsky, Vladimir Parpura, Marcela Pekna, Milos Pekny and Michael Sofroniew 1291–1301

Selected oral communications
Mitochondrial dynamics in astrocytes
Terri-Leigh Stephen, Swati Gupta-Agarwal and Josef T. Kittler 1302–1310

Functional impact of glycogen degradation on astrocytic signalling
Margit S. Müller 1311–1315

The contribution of astrocytes to Alzheimer’s disease
Amy M. Birch 1316–1320

Astrocytes and neuroinflammation in Alzheimer’s disease
Biochemical Society Focused Meeting

Membrane Morphology and Function
Hotel del Camerlengo, Fara San Martino, Abruzzo, Italy, 5–8 May 2014.

Edited by Banafshé Larijani [IKERBASQUE, Basque Foundation for Science and Unidad de Biofísica (CSIC-UPV/EHU), University of the Basque Country, Spain] and Marco Falasca (Barts and The London School of Medicine and Dentistry, U.K.)

WIP12b and Atg16L1: setting the stage for autophagosome formation
Michael I. Wilson, Hannah C. Dooley and Sharon A. Tooze 1327–1334

Principle of duality in phospholipids: regulators of membrane morphology and dynamics
Banafshé Larijani, Fadi Hamati, Aupola Kundu, Gary C. Chung, Marie-Charlotte Domart, Lucy Collinson and Dominic L. Poccia 1335–1342

Chemical intervention tools to probe phosphoinositide-dependent signalling
Rudiger Woscholski 1343–1348

Signalling specificity in the Akt pathway in breast cancer
Abbe R. Clark and Alex Toker 1349–1355

Plasticity of the actin cytoskeleton in response to extracellular matrix nanostructure and dimensionality
Josefine Starke, Bernhard Wehrle-Haller and Peter Friedl 1356–1366

Substrate trajectory through phospholipid-transporting P4-ATPases
Patrick Williamson 1367–1371

Lysophosphatidylinositol: a novel link between ABC transporters and G-protein-coupled receptors
Emily L. Ruban, Riccardo Ferro, Syamsul Ahmad Arifin and Marco Falasca 1372–1377

New insight into the intracellular roles of class II phosphoinositide 3-kinases
Tania Maffucci and Marco Falasca 1378–1382

Sec14-like phosphatidylinositol-transfer proteins and diversification of phosphoinositide signalling outcomes
Ashutosh Tripathi, Aaron H. Nile and Vytas A. Bankaitis 1383–1388

Dynamics of autophagosome formation: a pulse and a sequence of waves
Nicholas T. Ktistakis, Eleftherios Karanasios and Maria Manifava 1389–1395

Studies of the regulated assembly of SNARE complexes in adipocytes
Dimitrios Kioumourtzoglou, Jessica B.A. Sadler, Hannah L. Black, Rebecca Berends, Cassie Wellburn, Nia J. Bryant and Gwyn W. Gould 1396–1400

Biophysical properties of sphingosine, ceramides and other simple sphingolipids
Félix M. Goñi, Jesús Sot and Alicia Alonso 1401–1408

Selected oral communications
Histone variants and lipid metabolism
Michela Borghesan, Gianluigi Mazzoccoli, Fareeba Sheedfar, Jude Oben, Valerio Pazienza and Manlio Vinciguerra 1409–1413
