The Centenary Award

Signalling to eIF4E in cancer

Nadeem Siddiqui and Nahum Sonenberg

763–772

Early Career Research Award—Molecular Structure and Function

Probing the dynamic regulation of peripheral membrane proteins using hydrogen deuterium exchange–MS (HDX–MS)

Oscar Vadas and John E. Burke

773–786

Repetitive, Non-Globular Proteins: Nature to Nanotechnology

Held at the University of York, U.K., 30 March 2015–1 April 2015.

Self-generated covalent cross-links in the cell-surface adhesins of Gram-positive bacteria

Edward N. Baker, Christopher J. Squire and Paul G. Young

787–794

The role of chordin fragments generated by partial tolloid cleavage in regulating BMP activity

Helen Troilo, Anne L. Barrett, Alexander P. Wohl, Thomas A. Jowitt, Richard F. Collins, Christopher P. Bayley, Alexandra V. Zuk, Gerhard Sengle and Clair Baldock

795–800

Bespoke RNA recognition by Pumilio

Thomas A. Edwards

801–806

In search of the boundary between repetitive and non-repetitive protein sequences

François D. Richard and Andrey V. Kajava

807–811

Creating functional sophistication from simple protein building blocks, exemplified by factor H and the regulators of complement activation

Elisavet Makou, Andrew P. Herbert and Paul N. Barlow

812–818

The α Rep artificial repeat protein scaffold: a new tool for crystallization and live cell applications

Marie Valerio-Lepiniec, Agathe Urvoas, Anne Chevrel, Asma Guellouz, Yann Ferrandez,

Agnès Mesneau, Ines Li De La Sierra-Gallay, Magali Aumont-Nicaise, Michel Desmadril, Herman van Tilbeurgh and Philippe Minard	819–824
Biomolecular templating of functional hybrid nanostructures using repeat protein scaffolds David Romera, Pierre Couleaud, Sara H. Mejias, Antonio Aires and Aitziber L. Cortajarena	825–831
Comparison of protein repeat classifications based on structure and sequence families Lisanna Paladin and Silvio C.E. Tosatto	832–837
The centriolar protein CPAP G-box: an amyloid fibril in a single domain Erin E. Cutts, Alison Inglis, Phillip J. Stansfeld, Ioannis Vakonakis and Georgios N. Hatzopoulos	838–843
Repeat proteins challenge the concept of structural domains Rocío Espada, R. Gonzalo Parra, Manfred J. Sippl, Thierry Mora, Aleksandra M. Walczak and Diego U. Ferreiro	844–849
Structural advances on titin: towards an atomic understanding of multi-domain functions in myofilament mechanics and scaffolding Thomas Zacharchenko, Eleonore Von Castelmur, Daniel J. Rigden and Olga Mayans	850–855
Designing repeat proteins for biosensors and medical imaging Rachael N. Parker and Tijana Z. Grove	856–860
Two repetitive, biofilm-forming proteins from Staphylococci: from disorder to extension Fiona Whelan and Jennifer R. Potts	861–866
Emergence of <i>de novo</i> proteins from ‘dark genomic matter’ by ‘grow slow and moult’ Erich Bornberg-Bauer, Jonathan Schmitz and Magdalena Heberlein	867–873
A designed repeat protein as an affinity capture reagent Elizabeth B. Speltz, Rebecca S.H. Brown, Holly S. Hajare, Christian Schlieker and Lynne Regan	874–880
Dissecting and reprogramming the folding and assembly of tandem-repeat proteins Pamela J.E. Rowling, Elin M. Sivertsson, Albert Perez-Riba, Ewan R.G. Main and Laura S. Itzhaki	881–888

ATP binding cassette transporters: from mechanism to organism

Held at University of Chester, U.K., 16–18 April 2015.

Structural basis for the mechanism of ABC transporters Konstantinos Beis	889–893
Characterizing diverse orthologues of the cystic fibrosis transmembrane conductance regulator protein for structural studies Naomi L. Pollock, Tracy L. Rimington and Robert C. Ford	894–900

Molecular action of sulphonylureas on K_{ATP} channels: a real partnership between drugs and nucleotides Heidi De Wet and Peter Proks	901–907
The CydDC ABC transporter of <i>Escherichia coli</i> : new roles for a reductant efflux pump Mark Shepherd	908–912
ABCA3, a key player in neonatal respiratory transition and genetic disorders of the surfactant system Donatella Peca, Renato Cutrera, Andrea Masotti, Renata Boldrini and Olivier Danhaive	913–919
Understanding the function of ABCA7 in Alzheimer’s disease Hongyun Li, Tim Karl and Brett Garner	920–923
The role of ABCG-type ABC transporters in phytohormone transport Lorenzo Borghi, Joohyun Kang, Donghwi Ko, Youngsook Lee and Enrico Martinoia	924–930
Plant ABC transporters: time for biochemistry? François Lefèvre, Amandine Baijot and Marc Boutry	931–936
Role of family D ATP-binding cassette transporters (ABCD) in cancer Viktor Hlaváč and Pavel Souček	937–942
Structures and functions of mitochondrial ABC transporters Theresia A. Schaedler, Belinda Faust, Chitra A. Shintre, Elisabeth P. Carpenter, Vasundara Srinivasan, Hendrik W. van Veen and Janneke Balk	943–951
Homology modelling of human P-glycoprotein Laura Domicvica and Philip C. Biggin	952–958
Peroxisomal ABC transporters: functions and mechanism Alison Baker, David J. Carrier, Theresia Schaedler, Hans R. Waterham, Carlo W. van Roermund and Frederica L. Theodoulou	959–965
Learning from each other: ABC transporter regulation by protein phosphorylation in plant and mammalian systems Bibek Aryal, Christophe Laurent and Markus Geisler	966–974
Exploiting species differences to understand the CFTR Cl^- channel Samuel J. Bose, Toby S. Scott-Ward, Zhiwei Cai and David N. Sheppard	975–982
Oxidative footprinting in the study of structure and function of membrane proteins: current state and perspectives Vassiliy N. Bavro, Sayan Gupta and Corie Ralston	983–994
Providing a molecular mechanism for P-glycoprotein; why would I bother? Richard Callaghan	995–1002
Lipid flopping in the liver Kenneth J. Linton	1003–1010

The substrate-binding protein in bacterial ABC transporters: dissecting roles in the evolution of substrate specificity Abbas Maqbool, Richard S.P. Horler, Axel Muller, Anthony J. Wilkinson, Keith S. Wilson and Gavin H. Thomas	1011–1017
ABCB1 in children's brain tumours Beth Coyle, Maya Kessler, Durgagauri H. Sabnis and Ian D. Kerr	1018–1022
Investigating the dynamic nature of the ABC transporters: ABCB1 and MsbA as examples for the potential synergies of MD theory and EPR applications Thomas Stockner, Anna Mullen and Fraser Macmillan	1023–1032
ABC transporter research: going strong 40 years on Frederica L. Theodoulou and Ian D. Kerr	1033–1040
Watching conformational dynamics of ABC transporters with single-molecule tools Florence Husada, Giorgos Gouridis, Ruslan Vietrov, Gea K. Schuurman-Wolters, Evelyn Ploetz, Marijn De Boer, Bert Poolman and Thorben Cordes	1041–1047

Tribbles Pseudokinases on the Crossroads of Metabolism, Cancer, Immunity and Development

Held at The Aquincum Hotel, Budapest, 22–24 April 2015.

Tribbles at the cross-roads . . . Endre Kiss-Toth, Guillermo Velasco and Warren S. Pear	1049–1050
Tribbles and arthritis: what are the links? Andrew D. Rowan and Gary J. Litherland	1051–1056
Conservation of gene and tissue networks regulating insulin signalling in flies and vertebrates Rahul Das and Leonard L. Dobens	1057–1062
The role of TRIB1 in lipid metabolism; from genetics to pathways Sadahiko Iwamoto, Supichaya Boonvisut, Saho Makishima, Yuumi Ishizuka, Kazuhisa Watanabe and Kazuhiro Nakayama	1063–1068
Tribbles in inflammation Jessica Johnston, Shaghayegh Basatvat, Zabran Ilyas, Sheila Francis and Endre Kiss-Toth	1069–1074
Deciphering the role of TRIB1 in regulatory T-cells Richard Danger, Emilie Dugast, Faouzi Braza, Sophie Conchon and Sophie Brouard	1075–1078
Tribbles-1: a novel regulator of hepatic lipid metabolism in humans Robert C. Bauer, Batuhan O. Yenilmez and Daniel J. Rader	1079–1084
Tribbles breaking bad: TRIB2 suppresses FOXO and acts as an oncogenic protein in melanoma Wolfgang Link	1085–1088

TRIB2 and the ubiquitin proteasome system in cancer Mara Salomè, Joana Campos and Karen Keeshan	1089–1094
Tribbles pseudokinases: novel targets for chemical biology and drug discovery? Daniel M. Foulkes, Dominic P. Byrne, Fiona P. Bailey and Patrick A. Evers	1095–1103
The role of Trib1 in myeloid leukaemogenesis and differentiation Takuro Nakamura	1104–1107
The <i>TRIB3</i> Q84R polymorphism, insulin resistance and related metabolic alterations Sabrina Prudente and Vincenzo Trischitta	1108–1111
Tribbles in normal and malignant haematopoiesis Sarah J. Stein, Ethan A. Mack, Kelly S. Rome and Warren S. Pear	1112–1115
Tribbles role in reproduction Shaghyegh Basatvat, Deborah Angela Louise Carter, Endre Kiss-Toth and Alireza Fazeli	1116–1121
Oncosuppressive functions of tribbles pseudokinase 3 María Salazar, Mar Lorente, Alba Orea-Soufi, David Dávila, Tatiana Erazo, José Lizcano, Arkaitz Carracedo, Endre Kiss-Toth and Guillermo Velasco	1122–1126
