### 568TH MEETING, ABERDEEN

	PAGE
<b>Colloquium: Subunit Interaction and Enzymic Regulation</b>	
Chairman's introductory remarks. <i>By</i> H. M. Keir	603
The specificity of subunit interactions. <i>By</i> D. E. Koshland, Jr.	605
Mechanism and control of ribonucleoside diphosphate reductase. <i>By</i> L. Thelander	606
The function of thioredoxin and glutathione in deoxyribonucleic acid synthesis. <i>By</i> A. Holmgren	611
Coenzyme-induced conformational changes and subunit interactions of liver alcohol dehydrogenase. <i>By</i> C.-I. Brändén	612
Glutathione-dependent enzymes with regulatory properties. <i>By</i> B. Mannervik	615
Probing the active site of liver alcohol dehydrogenase. <i>By</i> H. Dutler	617
<b>Colloquium: Protomer Structure of Oligomeric Proteins</b>	
Protomer structure of oligomeric enzymes: Symmetry and allosteric interactions in yeast hexokinase. <i>By</i> T. A. Steitz, C. Anderson, W. Bennett, R. McDonald & R. Stenkamp	620
Protomer structure of glycoprotein hormones. <i>By</i> A. Stockell Hartree	623
<b>Colloquium: Structural Organization of Ribonucleic Acid and Protein in Ribonucleoprotein Particles</b>	
Structural organization of ribonucleoproteins in amphibian oocytes. <i>By</i> D. Malcolm & J. Sommerville	627
Cytoplasmic ribonucleoprotein particles in muscle cells. <i>By</i> M. E. Buckingham, R. G. Whalen & F. Gros	630
Ribonucleoproteins and heterogeneous nuclear ribonucleic acid metabolism in isolated HeLa-cell nuclei. <i>By</i> R. H. Burdon, A. Slater, T. Strachan & J. T. Douglas	632
<b>Colloquium: Steroid Binding and Oligomeric Proteins</b>	
Glucocorticoid-receptor interactions in rat liver. <i>By</i> J.-Å. Gustafsson, J. Carlstedt-Duke & Ö. Wrangé	633
Alcohol dehydrogenase: Structural studies, functional aspects and evolutionary conclusions in relation to steroid binding. <i>By</i> H. Jörnvall	636
Agonists, antagonists and models for glucocorticoid-receptor interactions. <i>By</i> P. A. Bell	639

	PAGE
<b>Colloquium: Structure and Function of Consecutive Glycolytic Enzymes</b>	
An analysis of the three-dimensional structure of chicken triose phosphate isomerase. <i>By</i> D. C. Phillips, P. S. Rivers, M. J. E. Sternberg, J. M. Thornton & I. A. Wilson	642
Coenzyme binding and co-operativity in D-glyceraldehyde 3-phosphate dehydrogenase. <i>By</i> G. Biesecker & A. J. Wonacott	647
The active site of yeast phosphoglycerate kinase. <i>By</i> H. C. Watson, T. N. Bryant, N. P. C. Walker, P. J. Shaw & P. L. Wendell	652
Structure of cat muscle pyruvate kinase at 0.26 nm resolution. <i>By</i> D. K. Stammers, M. Levine, D. I. Stuart & H. Muirhead	654
The active site of yeast phosphoglycerate mutase. <i>By</i> S. I. Winn, H. C. Watson, L. A. Fothergill & R. N. Harkins	657
<b>Communications</b>	
Ribosomal peptidyltransferase activity in rat skeletal muscle. <i>By</i> A. von der Decken	660
Phosphorylation of ribosomes in adenovirus infection. <i>By</i> G. E. Blair & I. Horak	660
Translation of mouse myeloma messenger ribonucleic acid in a messenger-dependent cell-free protein-synthesizing system. <i>By</i> S. A. Laidlaw & A. R. Williamson	661
Proteins present on polyadenylic acid segments of messenger ribonucleic acid in Ehrlich ascites-tumour cells. <i>By</i> W. J. van Venrooij, R. T. P. Jansen & D. B. Janssen	662
Endoribonuclease activity associated with heterogeneous nuclear ribonucleo-protein particles of HeLa cells. <i>By</i> T. Strachan & R. H. Burdon	663
Effects of oestradiol-17 $\beta$ on the synthesis of uterine heterogeneous nuclear ribonucleic acid. <i>By</i> S. Aziz & J. T. Knowler	664
Turnover of messenger-like ribonucleoproteins from rabbit reticulocyte cytosol. <i>By</i> Huynh-Van-Tan & G. Schapira	667
Phosphorylation <i>in vivo</i> and <i>in vitro</i> of proteins from HeLa cells: Heterogeneous nuclear ribonucleoprotein particles. <i>By</i> J.-M. Blanchard, C. Brunel & P. Jeanteur	670
Protein constituents of nuclear ribonucleoprotein from normal and virus-SV-40-infected cells. <i>By</i> G. N. Pagoulatos & M. Yaniv	671
Energy expenditure in the editing mechanism of protein synthesis. <i>By</i> R. S. Mulvey & A. R. Fersht	672
Deoxyribonucleic acid methylases in normal and polyoma-virus-transformed BHK-21 cells. <i>By</i> A. C. B. Cato & R. H. Burdon	675
The relationship between the activity of ribonuclease H and synthesis of deoxyribonucleic acid in synchronously growing BHK-21/C13 cells. <i>By</i> P. M. Duff & H. M. Keir	676
Inverted repeat sequences of <i>Physarum polycephalum</i> nuclear deoxyribonucleic acid. <i>By</i> P. L. Jack & N. Hardman	678
	1977

	PAGE
Nucleus-restricted polyadenylated ribonucleic acid species in mouse Friend cells. By A. Minty, L. Kleiman, G. Birnie & J. Paul	679
Some factors affecting polyribosomes isolated from the skeletal muscle of diabetic rats treated with insulin. By L. H. Fahmy & D. P. Leader	681
Conformational properties of the opiate peptide C-fragment, and related peptides from lipotropin. By P. M. Bayley, C. R. Snell & D. G. Smyth	683
Nitrated ribonuclease in the study of protein disulphide-bond formation and interchange. By D. A. Hillson & R. B. Freedman	686
A reversibly refolding non-covalent complex of three peptides from <i>Staphylococcus aureus</i> penicillinase. By E. A. Carrey & R. H. Pain	689
The reversible unfolding of yeast 3-phosphoglycerate kinase. By R. J. Burgess & R. H. Pain	692
Fragments resulting from the limited proteolytic digestion of a mollusc haemocyanin. By E. J. Wood & L. J. Mosby	694
The haemocyanin from the river snail <i>Viviparus viviparus</i> (L.): Some properties and subunit structure. By E. J. Wood & L. J. Mosby	696
The degradation of denatured fragment D from human fibrinogen by plasmin. By J. S. Lawrie, W. S. Gilmore & G. Kemp	699
The biosynthesis of caerulein. By D. S. Jones, M. E. Kidston, G. A. Simpson & B. P. Fuller	701
Membrane lipid metabolism in <i>Acholeplasma laidlawii</i> A during normal and temperature-shift-down conditions. By A. Christiansson & Å. Wieslander	702
Uridine diphosphate glucuronyltransferase activity in nuclei and nuclear envelopes of rat liver and its apparent induction by phenobarbital. By G. J. Wishart & D. J. Fry	705
3-Methylhistidine as a measure of skeletal-muscle protein catabolism in the adult New Zealand White rabbit. By C. I. Harris, G. Milne, G. E. Lobleby & G. A. Nicholas	706
Flux through the malate-aspartate shuttle in perfused rat heart. By K. R. Hogg & J. H. Ottaway	709
Release of polyamines from growing and serum-deprived BHK-21/C13 cells. By M. A. L. Melvin & H. M. Keir	711
A new method for immunochemical quantification. By C. Glad & A. O. Grubb	712
A thin-layer-chromatographic procedure for the separation of pethidine and its metabolites in urine. By S. E. F. O'Donoghue-Ryan & J. P. Ryan	715
Lectin binding to sexual cells in fungi. By B. E. Jones & G. W. Gooday	717
The effect of the transition between glyceraldehyde phosphate and its diol on the glycolytic flux ( <i>by title only</i> ). By J. H. Ottaway	719
The role of cytoplasmic glucocorticoid receptors in the cytolysis of human lymphoblastoid cells by methylprednisolone. By A. W. Waddell, C. C. Bird & A. R. Currie	719
Differential stimulation of foetal rat liver uridine diphosphate glucuronyltransferase activity towards certain substrates after glucocorticoid treatment in culture and <i>in utero</i> , and during natural development. By G. J. Wishart, S. Mossman, A. Donald & G. J. Dutton	721

	PAGE
Cortisone reductase and some small non-steroid analogues of its steroid substrates. <i>By</i> I. H. White & J. Jeffery	723
Hydrolysis of 3-esters of oestrogens by glutamate dehydrogenase and simultaneous acylation of the enzyme. <i>By</i> M. Pons, F. Michel, J. Julliard, B. Descomps & A. C. de Paulet	724
Uptake, metabolism and release of androgens by human skin fibroblasts. <i>By</i> M. B. Hodgins	725
Phosphofructokinase from <i>Bacillus stearothermophilus</i> . <i>By</i> P. J. Hudson, H. Hengartner & J. I. Harris	725
A novel bacterial phenylalanine aminotransferase. <i>By</i> G. W. Jack	726
Affinity purification of malate dehydrogenase and lactate dehydrogenase from fish muscle on micro-spherical porous ceramic adsorbents. <i>By</i> P. A. Anderson & L. Jervis	728
Mouse liver epoxide hydratase: Purification and identity with the rat liver enzyme. <i>By</i> R. G. Knowles & B. Burchell	731
The activity of poly(adenosine diphosphate ribose) polymerase during the embryonic development of the South African clawed toad <i>Xenopus laevis</i> . <i>By</i> F. Farzaneh & C. K. Pearson	733
The purification and preliminary investigation of fumarase, peroxidase, diamine oxidase and adenosine deaminase from human seminal plasma. <i>By</i> M. J. C. Crabbe & J. P. Kavanagh	735
Partial purification and some properties of acetyl-coenzyme A carboxylase from bovine mammary tissue. <i>By</i> A. Smith & I. P. Williamson	737
Calf thymus ribonucleotide reductase: Purification and properties. <i>By</i> S. Eriksson, M. Åkerman & L. Thelander	739
Preliminary characterization of the deoxyribonucleases of <i>Chlamydomonas reinhardtii</i> . <i>By</i> G. C. L. Tait & W. J. Harris	741
Properties of poly(adenosine diphosphate ribose) polymerase from baby-hamster kidney cells (BHK-21/C13). <i>By</i> H. M. Furneaux & C. K. Pearson	743
Changing-pH assay for study of glycogen phosphorylase activity under conditions simulating those <i>in vivo</i> . <i>By</i> J. M. Saad & J. C. Kernohan	745
The free radical in ribonucleotide reductase from <i>Escherichia coli</i> . <i>By</i> B.-M. Sjöberg & A. Gräslund	747
A method to detect protein-protein interactions. <i>By</i> L. Backman, V. Shanbag & G. Johansson	748
Triose phosphate isomerase: Interactions with ligands studied by [ <sup>31</sup> P]phosphorus nuclear magnetic resonance. <i>By</i> I. D. Campbell, P. A. Kiener, S. G. Waley & R. Wolfenden	750
The graphical diagnosis of positive and negative co-operativity and the factorability of the allosteric-binding polynomial. <i>By</i> W. G. Bardsley	753
The meaning of 'apparent kinetic constants' obtained from non-linear double-reciprocal plots. <i>By</i> W. G. Bardsley	756
The degree of steady-state rate equations for multi-subunit allosteric enzymes. <i>By</i> R. D. Waight & W. G. Bardsley	758
	1977

Reversible denaturation of rabbit muscle creatine kinase. <i>By G. F. Bickerstaff &amp; N. C. Price</i>	761
Effects of temperature and reagent size on the reaction of the thiol groups of rabbit muscle creatine kinase. <i>By N. C. Price</i>	764
Nucleotide and sugar substrate-binding sites on yeast hexokinase in solution as the native dimeric or monomeric form. <i>By A. K. Bhargava, S. Otieno, D. Serelis &amp; E. A. Barnard</i>	765
Product-inhibition studies with yeast and horse liver alcohol dehydrogenases. <i>By F. M. Dickinson &amp; C. J. Dickenson</i>	767
The possibility that the substrates of phosphoglycerate kinase may specifically regulate the direction of its reversible reaction. <i>By M. Larsson-Raznikiewicz &amp; B. Schierbeck</i>	770
The charge state of substrates and inhibitors when bound to <i>Lactobacillus casei</i> dihydrofolate reductase. <i>By K. Hood &amp; G. C. K. Roberts</i>	771
Cat muscle pyruvate kinase: Isolation of a reactive thiol-group-containing peptide. <i>By R. N. Harkins &amp; L. A. Fothergill</i>	772
Reaction of yeast phosphoglycerate mutase with butanedione. <i>By L. A. Fothergill</i>	774
A comparison of the binding of glucose to dimeric yeast hexokinase P-I and P-II isoenzymes. <i>By J. G. Hoggett, G. L. Kellet &amp; E. L. Tickner</i>	776
The interpretation of non-linear semilogarithmic plots for the time-dependent inhibition of acetylcholinesterase by active-site-directed reagents. <i>By P. Leff &amp; W. G. Bardsley</i>	778
Modification of enzyme action by non-specific binding of substrates. <i>By R. D. Waight &amp; W. G. Bardsley</i>	782
Some examples of the use of the theoretical-parent-hyperbola concept in enzyme kinetics. <i>By R. D. Waight &amp; W. G. Bardsley</i>	785
Patterns of apparent co-operativity of the steady-state of a simple non-equilibrium random substrate-modifier mechanism. <i>By E. P. Whitehead &amp; M. R. Egmond</i>	789
Purification and molecular properties of NADP-linked isocitrate dehydrogenase from ox heart mitochondria. <i>By N. MacFarlane, C. H. Reynolds, B. Matthews &amp; K. Dalziel</i>	79
<b>BOOK REVIEWS</b>	795
<b>BIOCHEMICAL REVIEWS</b>	
The physiological role and control of mammalian fatty acyl-coenzyme A desaturases. <i>By R. Jeffcoat</i>	811
Aspects of ruminant intermediary metabolism in relation to ketosis. <i>By G. D. Baird</i>	819
