Volume 6, Part 5, 1978

576TH MEETING, LONDON

Colloquium: Renal Membrane Function in Health and Disease

Metabolic heterogeneity of renal tubule cells (by title only). By U. Schmidt 825
Membrane molecular aspects of tubule solute transport. By R. Kinne 830
Physiological consequences of the cellular distribution of sodium-plus-potassium ion-dependent adenosine triphosphatase. By J. E. Kyte 833
Intrarenal action of angiotensin (by title only). By W. S. Peart 836
Recent advances in the study of the disturbance of electrolyte transport in Bartter's Syndrome (by title only). By E. Bourke & V. Delaney 836
Renal role of parathyroid hormone (by title only). By F. P. Muldowney 836
Hormonal changes and transport adaptation in chronic renal failure: The possible role of a natriuretic hormone. By A. Licht, S. Stein & N. S. Bricker 837

Colloquium: Neuronal and Synaptic Adaptation

Cellular basis for long-term neuronal adaptation. By J. Z. Young 839
The possible significance for learning of some different types of synaptic modification. By A. R. Gardner-Medwin 841
Macromolecular mechanisms and long-term changes in behaviour. By S. P. R. Rose 844
Presynaptic factors preconditioning synaptic activity. By J. de Belleroche & H. F. Bradford 848
Pharmacological and physiological correlates of variable receptor sensitivity. By M. Wilkinson 853
Possible roles for purine compounds in neuronal adaptation. By T. W. Stone 858
Protein phosphorylation as a possible mechanism in neuronal adaptation. By H. Holmes & R. Rodnight 863
Chairman's Survey: Neuronal and synaptic adaptation. By H. S. Bachelard 865

Vol. 6
Colloquium: Regulation of Cholesterol Biosynthesis and Catabolism

Measurement of cholesterol biosynthesis in vivo with tritiated water. By R. Fears 871

Cholesterol biosynthesis in hepatocytes. By G. F. Gibbons & C. R. Pullinger 875

Compartmentation and supply of cholesterol: Two important factors in the co-ordinate regulation of hydroxymethylglutaryl-CoA reductase and cholesterol 7α-hydroxylase. By K. A. Mitropoulos, S. Venkatesan & S. Balasubramaniam 878

Cholesterol metabolism in arterial smooth muscle and endothelium. By J. P. D. Reckless 883

High-density lipoproteins and atherosclerosis. By D. J. Betteridge 888

Cholesterol metabolism and steroid-hormone production. By R. Hume & G. S. Boyd 893

Cholesterol transformation to biliary acids in vivo in the rat. By F. Chevallier & D. Mathé 898

Colloquium: Photosystem II

Oxygen evolution: Some historical aspects. By R. Hill 901

Variations in photosynthetic electron-transport pathways in Chlorella vulgaris. By J. Sinclair & A. Sarai 904

Absorbance and fluorescence changes by photosystem-II electron acceptors (by title only). By H. J. Van Gorkum, A.-L. Etienne & A. C. F. Gorren 906

Electron-paramagnetic-resonance studies of photosystem II. By M. C. W. Evans 906

New insights on the primary electron-acceptor complex of photosystem II. By R. Malkin & J. Barber 909

Communications

The influence of calcium ions on the uptake of sugars by rat small intestine in vitro. By A. S. Manning, J. M. McMullan & D. F. Evered 914

The intestinal absorption of lead. By I. P. L. Coleman, M. E. Hilburn & J. A. Blair 915

Variation in adenosine triphosphatase activities in serial preparations of human erythrocyte membranes. By J. E. Hesketh & H. W. Reading 918

Albumin is associated with the inner surface of the lymphocyte plasma membrane. By M. J. Owen, B. H. Barber, R. A. Faulkes & M. J. Crumpton 920

Formation of hybrid liposomes from negatively and positively charged liposomes: A possible model for the study of membrane fusion. By D. H. Wreschner & G. Gregoriadis 922

Incorporation of hepatitis-B surface antigen (HB₄Ag) into liposomes. By E. K. Manesis, C. H. Cameron & G. Gregoriadis 925

Uncoupling of work and adenosine triphosphate utilization in daunorubicin cardiotoxicity. By J. W. Dow & J. H. Burns 928

1978
Preparation of a nuclear membrane fraction from normal and from herpes virus-infected BHK cells. By W. S. Steveley & C. J. Packard

929

930

933

Isolation of an active fragment of protein phoshatase inhibitor-1 from rabbit skeletal muscle. By S. Shenolikar, J. G. Foulkes & P. Cohen

935

Purification of bovine spleen collagenolytic cathepsin (cathepsin N). By A. Ducastaing & D. J. Etherington

938

Purification and compositional relatedness of aldehyde reductase from several species. By W. S. Davidson, L. Weihrauch & T. G. Flynn

940

Kinetics and mechanism of action of aldehyde reductase from pig kidney. By W. S. Davidson & T. G. Flynn

943

Requirements for the inhibition of sodium and potassium ion-transporting adenosine triphosphatase by adriamycin. By M. Gosálvez & M. F. Blanco

945

The isolation of a neutral proteinase from the urine of a patient with Goodpasture’s syndrome. By M. Davies, E. Sanders, G. A. Coles & K. T. Hughes

947

The phosphorylation of rabbit skeletal-muscle glycogen synthase by cyclic AMP-dependent protein kinase. By C. Proud

950

Effects of chelators and calcium ions on the response of renal adenosine triphosphatase activity to hormones and concanavalin A. By S. Al-Saleh & K. P. Wheeler

952

Activation of carbonic anhydrase from erythrocytes of chicks and rabbits by adenosine 3':5'-cyclic monophosphate-dependent protein kinases. By P. Dietsch, A. P. Schaefer, M. Buhle & P. R. Siegmund

953

The effect of age on the number of monoamine oxidase active centres in the rat heart. By C. J. Fowler & B. A. Callingham

955

Release of lysosomal acid phosphatase by extracts from oral streptococci. By R. Duguid & G. Cooney

957

Properties of 5-hydroxyisophthalate 4-hydroxylase from a Coryneform bacteria. By E. A. Elmorsi & D. J. Hopper

958

959

Effects of age, inducing agents and carcinogens on the distribution of cytochrome P-450 in microsomal membranes from rat liver. By T. W. Poole & D. V. Parke

959

Metabolic activation of carbon tetrachloride to a free-radical product: Studies using a spin trap. By A. Ingall, K. A. K. Lott, T. F. Slater, S. Finch & A. Stier

962

Metabolism and biliary excretion of NN-dimethylaminoazobenzene: A possible role for liver glutathione. By W. G. Levine

964

Metabolism of transferrin-bound iron by the liver: A study in vivo. By J. P. Milsom & R. G. Batay

966

Vol. 6
Effects of starvation, diabetes and 2-bromo-α-ergocryptine treatment on pyruvate dehydrogenase activity in lactating rat mammary gland. By M. A. Baxter, M. A. Goheer & H. G. Coore

Correlations between androgen metabolism and sebaceous-gland activity. By M. F. Cooper, J. B. Hay, D. McGibbon & S. Shuster

The reactions of 1 nm plutonium dioxide particles with rat lung fluid. By J. R. Cooper, G. N. Stradling, H. Smith & S. E. Breadmore

Chloramphenicol and ethidium bromide effects on flight-muscle mitochondria of the blowfly Calliphora erythrocephala. By B. M. Ashour, S. M. Danks & P. A. Whittaker

Protein synthesis in petite mutants of the yeast Kluyveromyces lactis. By J. Heritage & P. A. Whittaker

Alternative respiration pathways in the petite-negative yeast Kluyveromyces lactis. By A. J. Morgan & P. A. Whittaker

Reversible modulation of rat liver 3-hydroxy-3-methylglutaryl-coenzyme A reductase: Evidence for an interconvertible system. By F. G. Hegardt & J. Bové

Lipogenesis in sheep adipose tissue maintained in tissue culture: Effects of insulin and growth hormone. By R. G. Vernon

The urea cycle in different types of macrophages. By F. Hofmann, J. Kreusch, K.-P. Maier, P. G. Munder & K. Decker

Phosphoproteins and related enzymes in isolated synaptic-junctional structures. By M. Ng & A. I. Matus

The effect of L-3,4-dihydroxyphenylalanine (l-dopa) on the incorporation of radioactive amino acids into rat brain protein. By M. D. King & P. W. Beesley

Liver tryptophan pyrrolase and brain 5-hydroxytryptamine: Effects of chronic ethanol administration. By A. A.-B. Badawy, N. F. Punjani & M. Evans

The antagonism by naloxone of agents that interact with dopaminergic neurones. By P. W. Dettmar, A. Cowan & D. S. Walter

Persistence of increased histone kinase activity of neocortical tissues in relation to excitation and to adenosine 3':5'-cyclic monophosphate. By M. E. Newman, H. McIlwain & J. Patel

Effects of pre- and peri-natal restricted food intake on sulphated glycosaminoglycan concentrations in rat brain. By C. J. Branford White

Progestin receptors in the hypothalamus of immature and mature female rats. By S. Thrower & L. Lim
Changes in the size and protein turnover of the soleus muscle in response to immobilization or denervation. By D. F. Goldspink

The effects of cortisone treatment on the protein turnover of the soleus muscle after immobilization. By J. A. McGrath & D. F. Goldspink

Colchicine persistence and binding in goldfish brain. By G. Clingbine & C. E. Heading

Effects of acute hyperbaric exposure on the concentration of alanine and other metabolites in mouse tissues. By G. Evans, D. R. Nelson & A. K. Huggins

Increased incorporation of [3H]fucose into synaptic membranes of the visual cortex after first exposure to light of dark-reared rats. By R. D. Burgoyne & S. P. R. Rose

Fructose 1,6-bisphosphatase activity in the brain of mice and rats submitted to the convulsant methionine sulfoximine. By T. Hevor & J. Gayet

Stimulation of the breakdown and resynthesis of phosphatidylinositol in rat hepatocytes by angiotensin, vasopressin and adrenaline. By M. M. Billah & R. H. Michell

Enhanced phosphatidylinositol breakdown as a calcium-independent response of rat parotid fragments to substance P. By L. M. Jones & R. H. Michell

Relationship between 5-hydroxytryptamine activation of phosphatidylinositol hydrolysis and calcium-ion entry in Calliphora salivary glands. By J. N. Fain & M. J. Berridge

Preparation of active fractions enriched in photosystem I and photosystem II from the thermophilic blue-green alga Phormidium laminosum. By A. C. Stewart & D. S. Bendall

Alteration in concentration of carotenoids in Rhodopseudomonas capsulata transferred from dark to light growth. By J. Manwaring, C. A. Pullin, E. H. Evans & G. Britton

Problems relating to the storage and treatment of urine samples before radioimmunoassay for Tamm–Horsfall glycoprotein. By A. A. Goodall & R. D. Marshall

Separation of picomolar concentrations of adenine and guanine nucleotides and nucleosides by high-performance thin-layer chromatography on silica gel. By I. Das

The use of immobilized creatine kinase to study antibody–antigen interaction by immunoabsorption of enzyme-specific antibodies. By S. Cherif & E. J. Milner-White 1050

Ampholyte-displacement chromatography for the separation of serum proteins. By J. L. Young, B. A. Webb, D. G. Coutie & B. Reid 1051

Restriction-endonuclease mapping of mitochondrial DNA from Tetrahymena pyriformis. By J. D. Norton & I. G. Jones 1054

Mechanism of transcription repression during erythroid development in the rabbit. By L. S. L. Hsu, J. A. Davies & C. J. Chesterton 1057

Reutilization of [3H]uridine in polyadenylated and ribosomal ribonucleic acid. By W. T. Melvin & H. M. Keir 1063

Genetic control of the immune response to bacteriophage λX174 in inbred mice. By N. N. Suh & A. Ebringer 1065

Nucleotide synthesis from purine bases and nucleosides in rat skeletal muscle. By T. G. Sheehan & E. R. Tully 1070

Factors affecting the early stimulation of uridine uptake by lymphocytes incubated with phytohaemagglutinin. By E. Girit, C. A. Phillips & J. E. Kay 1077

Thymidine uptake in F1 rat cells stimulated by mitomycin-C-treated lymphocytes. By R. Subramaniam & A. Ebringer 1079

Chemical activation of native prothrombin. By C. R. W. Gray 1081
